I am in NO way responsible for anything you do with the service I provide you.

You will not use my services for malicious intentions.

This service is to teach people how to setup RATs and troubleshoot errors, not for malicious use.

I WILL NOT assist anyone to do anything illegal.

Do not ask how me how to spread. There are threads that you can pay for spreading guide on HF.

You can show your support

BTC : 12DAzJCDJrTSf389vscAaQ7oFAG8ayC9ke

Note: I will not ask for money in any kind of way except you want me to help you purchase a tool or service, which I'm better off recommending to you where you can get it yourself.

And my skype ID is the one with an FSociety avi.

Hope to help out as many people as I can.

It's a free service. I meant DNS

kevy42 - May 15, 2017, 8:39 am

not a bad thread design, GL ?

Yes its free service but noip is owned by microsoft and both noip and dnsafraid works with SPAMHAUS. as soon they realize you use your dns for malicious purposes, they will delete your domain. Its better to use paid dns service or bulletproof domain. Presonally i can recommend

punkdns.top

?ch?m?ll?? - May 16, 2017, 4:42 am

Update done on thread for jabber users to contact me on

Yes i agree with you. But its not a bad idea for starters that's why I chose those services. punkdns.top isnt a bad idea too but im not trying to encourage maliciousness ? ?

Vezel - May 19, 2017, 2:19 pm

Why are you recommending no-ip? They are not safe.. At all..

Other than that, thanks for helping the community :)

No-ip is a nice free DNS but not for massive spreading.

Isn't a lot stable and police can read the log.

Hope i helped you.

Just as babyfox said. I understand where youre coming from but there isnt actually an issue if you aren't using it maliciously. And then again this is for educational purposes not the real deal ?
