Thread: [Leakedsource.ru BOT | Create huge wordlists | FREE](#)

Veze1 - May 19, 2017, 11:40 am

Dosn't work anymore. They added captcha.

Hi!

So I just made a bot for leakedsource.ru, you need to have a premium account for it to work (they are really cheap).

You give the script a wordlist containing only usernames (one per row). It will create a new file with the following look:

username:password

Image:

Spoiler ([Click to View](#))

All with REAL passwords!

Download [here](#)

Checking this out now looks pretty cool OP

Tung - May 30, 2017, 11:54 am

I like what it can do but no Virus Scan?!

Veze1 - May 30, 2017, 11:56 am

.. You can see the source-code. It's obvious it's not a virus

Bot works very cleanly, thanks Veze1!

smokemeh - June 1, 2017, 9:26 am

good shit bro, thanks for sharing!

kickerz12 - August 25, 2017, 6:14 am

there is captcha in leakedsource login can u add it in bot
