Thread: [Best Windows VPS Provider?](#)

Mark Zuckerberg - May 19, 2017, 7:57 pm

Im looking for a windows vps at least 4gb of ram for a cheap price from a reliable host.

I've never purchased a VPS from any hosting companies before, so I don't know who has the best service.

Anyone have any recommendations?

?

You're going to get linked to a bunch of people's own "companies". I would take any responses here with a grain or two of salt.

Yeah I wasnt planning on buying anything sold on this site, I was just looking to see if anyone had any reviews on actual good hosts VPS services.

wander is a multi dwc - May 19, 2017, 10:45 pm

Winity.IO

XeonRDP

I've used them both for my Windows VPS needs, probably the only thing I'll ever vouch for in this category.

Thanks for recommending us.

Note: We are not a host available at Hackforums only. Seach google to see more. We just advertise here and enjoy some time. ?

Have a look here:

<http://lowendbox.com>

Filter for Windows VPS.

The last two I used were PulseServers and BuyVM. I can recommend them both. I found them on the mentioned site.
