Thread: [\[VERGECOIN\] - My New Prediction - \\$0.000395](#)

Pronouncer - May 20, 2017, 5:52 am

lemme give you a little background information on me.

In the past three months i have managed to turn \$20 into 500\$ + within a week by using altcoin. Although the amount i play with is low i have never made a single loss and all the investments i have ever done have paid off for me.

So whats my new prediction?

VergeCoin

So why am i investing into verge coin?

Well, I've taken hours out of my day, and researched this coin, seeing what it can offer and I'm shocked to say that I really like this. The coin uses numerous algorithms, and privacy tools trying to make it a fully anonymous coin.

The coin creators seem to be very organized in my opinion, they have numerous dedicated Tor nodes for this and have fully organized their mining rewards.

So from my perspective this is the coin i will be chucking a few hundred dollars into.

The coin is valued at \$0.000394 and my prediction for 2018 is \$0.01 or \$0.008.

Say you invest today \$10 that would be

20-05-17: \$10 = 25233.0270043916 coins

If the coin hits 1 cent thats \$252 its better than gambling it on satoshi mines

This is simply my opinion and my advice. There is a lot of profit that can be made with this coin. Ofcourse i could be wrong and take no responsibility for a loss

You can buy it on bitrex

This is simply my opinion, im neither telling you or forcing you to buy into the coin, its just what i am doing :)

Are you in any way affiliated with the team running this coin?

IzzyJohnson - May 20, 2017, 5:56 am

Looks promising, been looking to get some other coins under my belt.

I saw this coin when it was the price of 4. Has no use but can get lucky with a pump and dump

Johnny Vuitton - May 20, 2017, 6:40 am

Actually invested into this yesterday! Long term coin for me :)

Interesting, just gone off and researched a little bit myself after reading OP's post and looks like it has potential to make some good profit. Threw a bit of cash in, nothing too much but bought around 160k. Hopefully this will double or triple at least in price

Going to sell my btc then invest into this coin :)
thanks for letting us know!

Sivebeak - May 20, 2017, 8:05 am

I have around 450k of this xvg coin. I'm holding it because of the team and because when the market will boom to 100bn, this one will be up around sia value.

Rake - May 20, 2017, 8:08 am

Wish I could withdraw another 1 BTC to invest into this, but poloniex has a fuck ass limit of 2000\$ daily

Hmm, I see 0 innovation in this coin though. We shall see. Good luck to everyone putting money into this.

Fair enough ? it's down to everyone whether to invest. A good investor makes their own choices not following the sheep ?

My investment is based on my gut and research

James Harden - May 20, 2017, 11:02 pm

Bought 500k of this coin about 2-3 months ago, From my reading its been pumped up to this way as the charts were not stable when I was checking but I'm not complaining as Im up about 800% lol

kamika\$e - May 20, 2017, 11:03 pm

It's definitely a pump and dump coin. I invested \$100 and profited \$80 due to the pumps.

Evanescent - May 21, 2017, 12:55 am

Invested few dollars. I'm an investor, I can wait patiently. Waiting for it to reach 1\$ to 5\$ range.

d4rkj4y - May 21, 2017, 1:08 am

This is a solid coin to invest in, saw it a few weeks back.
This, and bitbay, along with SC and DGB.
