E-Whoring For Noobs

What is e-Whoring?

Do I really need to explain what a whore means, it explains itself doesn't it. A whore is a whore and ewhoring means an online whore. This may be a bit uncomfortable for some people but making money through ewhoring is the easiest thing that you can do to start off your marketing venture on the right track. Ewhoring is a black hat seo technique of making money online that translates into posing as a girl on the Internet.

The Basics

1. Join a java chat room under a proxy/vpn with a "cutesy" username such as "jessicaaxoxo" or "megannnn1992". Please note that if you are targeting pedophiles you should adjust your username properly so that they will be "attracted" to you.

Chat Sites:

Chat-Avenue; <http://www.chat-avenue.com>

321TeenChat: <http://321teenchat.com>

321AdultChat: <http://321adultchat.com>

2. Try to be subtle when advertising your "services". Remember you are a girl who is in need of money so dont just spam "CAMS FOR \$\$" be direct and subtle like " doing cam shows for cash ;) Pm me if interested ;)"

3. When your victim does private message you, add him/her on MSN or some other chat client. This is important because Java chat rooms sometimes timeout, severing your connection.

4. Either use a program known as ManyCam or FakeWebCam to put on a cam show for the victim so that they think you are actually who you claim to be.

5. At this point its just a matter of collecting the money. Paypal is very popular since it is easy to use and widely accepted. However feel free to exploit these weak individuals for whatever you want.

Tips:

1. Do not go in straight for the kill immediately. Lure the victim into a sense of power and control by pretending to be the weaker needy individual. This is a classic human reaction that when in the presence of a weaker being we tend to either pity or generous towards.

2. Have friends close at hand! This is good to have people help you in case you freeze up and forget to stay in character.

3. Preparation is essential to eWhoring. You must have a vast archive of videos and pictures to certain girls that you can access on demand. This is to keep a sense of reality in your story since a victim won't believe you if you show him/her pics of one persona and when "you get on cam" it's another person.

4. Some people are experienced perverts/pedophiles, they will make you show some sort of proof that you are "real" either by making you wave or holding up your thumb and etc. This is most usually unsurmountable and when faced in this situation just take a moment and breathe. Then proceed to block/delete the person off your friends list and move on to the next victim.

5. Know Your Limits, eWhoring is great for quick money but greed is your achilles heel. Know when to stop and take a moment to re-examine your method/tricks. This can lead to quick mastery of the art of Social Engineering.
