That's actually really nice, props to you.

Perhaps change the background to be the same as hf's gray. Like swap the gray colors. Not sure.

It's always nice to see how things are created, so I thought I'd put them with this design.

Thanks buddy!

I admire the way the design has come to life with the contrasting colors.

I'd say the flow looks on point. I wouldn't change anything about it
