Bugscape

Bugscape is a new type of RSPS. Rather than attempting to stop bug abuse by banning abusers and patching all bugs, bugscape attempts to balance bug abuse by creating glitches that are fun to exploit and have a moderate reward for performing them. Dupes and pvp bugs are the only bugs which are actively patched. This means that the bugs which are intentionally left in serve to benefit bug abusers, but not to harm normal players in any way. Of course, we accept the fact that new exploits will be found and reward those who find dupes or pvp bugs accordingly. Our server is sponsored by the RSPS glitching forum Rspunit, and as such bug abusers are our primary player base.

Bug Credits

Smuggling certain items or stances on the server will allow you to trade them in for bug credits. You can also rarely obtain bug credits from slayer. Bug credits are a newpoints integrated point shop system, which allows you to use both the bug credit shop on the server as well as the various gambling plugins found on the RSPUnit / bugscape forums located at [RSPUnit](#). NOTE: Integrated bug points to the server is currently being redone.

FEATURES[Bug Abuse Task List](#)

Bug Credits system rewards you for bug abusing

NEVER EVER PAY TO WIN!

Dupes are patched, to keep the game fair. There may be one dupe, but if you can find it, you'll surprise me.

Custom mini dungeon with a custom scripted boss

Full 2007 remake content, with many quests including Monkey Madness, Dragon Slayer, Waterfall Quest, and Lost City

Full pest control working as it does in Runescape

Full warriors guild with animated armor and cyclops

All skills working exactly as they do in RS (including farming, runecrafting pouches, coal trucks, etc.)

Rare drop announcements

Colored text in ::yell

Full treasure trails

Clan Chat

Custom boss drops bandos equipment

Active staff, frequent updates

Fight Caves (all waves)

Shops at lumbridge for easy access

Loot Highlighting (Rare items show different color text)

Friendly staff & community

Botting is allowed, as long as you're at the keyboard

Client hacking is encouraged

Media

More coming soon...

#### XP

Bugscape has a comfortable 20x xp rate for most stats, with combat stats buffed to 25x. There are also XP lamps which you can purchase for bug credits, that yield a significant amount of exp based on level.

#### Slayer

All slayer targets will ALWAYS drop gp, so if you're in need of cash you can just run some slayer. The minimum GP drop is 100gp, but it goes up to 3k at the upper limit of a rare GP drop. We feature the slayer tower, the fremmenik slayer dungeon, and all other major slayer locations with the exception of the gnome stronghold dungeon.

#### But I can't bug abuse

While our server is primarily dedicated to glitches, there is also tons of content for regular players as well. If you just want a server with a relaxed XP rate, tons of fun content, and one of the most fun communities of people you'll find on an RSPS look no further. If your goal is to learn bug abuse, that's fine too. We're currently even developing a bug abuse quest to help beginners learn the ropes. No matter your experience level, you'll find your niche.

#### Play

You can download our client [Here](#)

Fully Custom High Scores Currently Down (Being Worked On)

**WRT** - May 22, 2017, 8:39 am

Will definitely check this out! Seems really solid.

Doesn't look like full

Quote:Full 2007 remake content, with many quests including Monkey Madness, Dragon Slayer, Waterfall Quest, and Lost City

Any pictures of that? I find it hard to believe ?

Any pictures of that? I find it hard to believe ?Why don't you just login? You clearly didn't even bother to spend the time to answer your own question.

Some quests are indeed missing, but there is a large quantity of quests that are there. You'd help yourself by taking the time to look into something instead of shitposting. ?

And if you spend a little time on the server you'd understand the picture.

**Miraisalam** - May 22, 2017, 2:45 pm

Oh the nostalgia ?. Been a while for sure, but I remember having so much fun bug abusing back in the day.

I'll have some fun with this later, thanks.

That's exactly what advertisement (thread) is for, to show-off your features that are supposed to attract potential players.

Before I want to log on I want to see what you're offering instead of possibly wasting time downloading generic cache/client to be disappointed with the same features/content ?

**Wet Rag** - May 23, 2017, 6:32 am

Goodluck with this my dude

**Zenomhunter** - May 23, 2017, 6:35 am

LOL, nice runeagent and reflection client ;) I assume that if your server will be big, you will see me selling owner accs, guarantee you your server will be dead fast, also Ama has created his own server with Alex the man (Idk how aware or how much you know about the rs hacking community) but runeagent, if you know how to abuse packets, is deadly lol.

**Wet Rag** - May 23, 2017, 6:47 am

We get it, you're an edgy skid

Before I want to log on I want to see what you're offering instead of possibly wasting time downloading generic cache/client to be disappointed with the same features/content ? You clearly were not interested in learning more information, and just targeted myself and the server to provoke someone. Also, this server is obviously not generic because you are supposed to find bugs on it, lol. Good luck trying to find this source on Rune-Server or somewhere, you won't find it. TBH, I don't care if the server gets big or not, the whole point is for people to learn to bug abuse.

(May 23, 2017 06:35 AM)Zenomhunter Wrote: [\[CITE\]](#) LOL, nice runeagent and reflection client ;) I assume that if your server will be big, you will see me selling owner accs, guarantee you your server will be dead fast, also Ama has created his own server with Alex the man (Idk how aware or how much you know about the rs hacking community) but runeagent, if you know how to abuse packets, is deadly lol.

I can't tell if this is sarcasm or if you are simply retarded. For starters, Ama I have worked together in the past. I taught Ama a lot, but I will admit, he is far more superior than myself at this point. I've known him for years and he is one of the most favorable bug abusers I have spoken to. I don't think he and I will ever lose contact with each other...

Quote:selling owner accs Second, if you are referring to using the good ol' leaked force admin method, it won't work. There is a password limit.

Finally, you say nice Rune Agent and reflection, but then you say I don't know anything about RSPS.

Edit: You didn't even mention my CE auto-assembler. :(

You want to talk RSPS? Okay, let's talk RSPS.

OS-Scape, Near-Reality, SoulPlay, Simplicity, and PkHonor all have bugs worth noting. Not going to which specifically, but on each server there is at least one of the following on it: CFT, PAFT, Dupe, Smuggle, and/or another bug that will go unmentioned. :)

**SIM-2501407** - May 29, 2017, 12:19 am

This thread is as dead as the server, but it is a good way to start learning how to bug abuse.
