Thread: [Downloading all videos from liked videos folder in youtube](#)

tripleseven - May 22, 2017, 2:42 am

So i got a big amount of tunes i saved in my liked videos folder, is there any way to download these all in once? I tried it with a variety of youtube to mp3 convertors but its not working.

A solution would be GREATLY appreciated cause it will save me a shitload of time

deadsh0t - May 22, 2017, 2:45 am

mmmmmmm i think you would be best off to add all those videos into a playlist because most youtube to mp3 coverters (not online i mean actual programmes)

Can easily download every song from a playlist automaticly

Reporter - May 22, 2017, 2:48 am

Yes PM me and I give you the name.

I used it to download ~73,000 videos from Youtube

Just paste whatever link (playlist, likes ect..) / Channel URL and it will do everything for you.

Im still looking for a solution! Reporter hit me up with 4k youtube downloader, however i already own this software (premium version) and unfortunately its not working. It might be because i have about 1.5k+ songs in my liked folder. Anyone knows of a method to make a playlist out of the liked videos folder? Would be greatly appreciated, cheers!
