A guide to REAL Hacking on HackForums.net

Written by : Encrypted32 aka coded32.

Hello, Encrypted32 aka coded32 Here. This is My First ThREAD. I Hope this guide Helps you. Make sure you don't Leech this Guide with your credit because it's 100% written by Encrypted32 aka coded32.

It takes Time to design aTUT so Please do Reply and comment so that I can do it more Better. Feedbacks are Appretiated.

A Little Introduction to Myself.

- I am Encrypted32, People know me by "coded32".If you need my Traces go to google.com and search for coded32, you are sure to Trace me. I am a freedom Lover and a guy of Hope and confidence. Nothing affects me.

I am a Atheist and I am not Fool Blind follower of religion to card my life into it without any of its existence.

For me there is only one Religion "Freedom".

Today i am Gonna show you how to begin with Hacking in Easy and perfect Step-Wise form. First of all These are the following stuff's you should remmember before starting to follow my guidelines.

The Thing's to remmember are the Following :

- 1.) Do not Ever speak L33T. Limit it to a certain point.
- 2.) Never Challenge anyone that you are a Hacker and you are going to hijack his/her Account.
- 3.) Never mention Paypal Acc hacking or Credit cards because it makes you Fake and in a way very robust.
- 4.) If you know to Hack sophisticated systems, don't ever show it !! Be Unknown.
- 5.) Never Pot more than that is needed in a Forum (Ex : hackforums.net)
- 6.) Never End up Messing with anyone. Remmember you never know who he is. Is he a FED or so ???

Now to Begin with the Guide in simple Steps, Here I go :-----

- 1.) Before joining a Forum, Make sure you know atleast one Programming language. C++ I Reccommend.

- 2.) Second of all google "HacktheGame". Play it and you will get a Basic Experience.
- 3.) Read E-books Written by "Ankit Fadia". They are in Simple Language and are Easily Understable. Google it.
- 4.) Now The things you don't understand in the E-Book, write it somewhere and start a THREAD in a security forum to Discuss.
- 5.) Always make sure that you Google a bit before you ask a Question. Serach in th Forum search bar and so.....
- 6.) Next Step is "Not to be a Skid" Thing...never use Tools if you don't ned one ! well you can use Basic tools.
- 7.) Join a Social Network and start Practising your Skills on others. SE 'em !
- 8.) Try to know more about LFI,RFI and SQLi. Google 'em or search here at Hackforums.
- 9.) Make New friends who can Help you In Hacking. (Alliance Team)

Some Good References in Hackforums.net

- 1.) Get here to Start Asking Questions <The Alliance Help Desk> = <https://hackforums.net/showthread.php?tid=532770>
- 2.) To Learn Basic about C++ = <https://hackforums.net/showthread.php?tid=562307>
- 3.) These are the Basics of Hacking = <https://hackforums.net/showthread.php?tid=26425>
- 4.) Navigation to Top Tutorials = <https://hackforums.net/showthread.php?tid=504268>
- 5.) How to get Free E-books worth \$\$ = <https://hackforums.net/showthread.php?tid=562558>
- 6.) How NOT to be a Skid = <https://hackforums.net/showthread.php?tid=545888>
- 7.) Choosing your Programming Language = <https://hackforums.net/showthread.php?tid=521508>

I will Keep Updating this THREAD once I have Enough Resources to Dump IN...Enjoy and don't Foget to Feedback.

kkiller - July 24, 2010, 12:18 am

Thank you ill be cumming to this thread every once and a while :)

pwntoken - July 24, 2010, 12:22 am

(Jul 24, 2010 12:18 AM)? Hax0rful ? Wrote: [CITE](#) Thank you ill be cumming to this thread every once and a while :)

I will be waiting. glad that I can HELP you ~~

mark212 - July 24, 2010, 12:52 am

maybe you should include the tip to spell check your posts, lol,

still good though, nice job

le@rner - July 24, 2010, 1:59 am

I will keep coming there bro

keep the work up

tfs

mcpain - July 24, 2010, 2:07 am

thanks, thanks for shaing this , , , i searched for ankit fadia and found this

http://en.wikipedia.org/wiki/Ankit_Fadia

he is fake

Risen - July 24, 2010, 2:36 am

Nice tutorial dude.

I'll come back now and then to check up on it ;)

Risen

Montana - July 24, 2010, 2:51 am

Great threat, can't wait to see the updated version.

What do mean by "rainbow colors" Buddy ??

Seifer Blade - July 31, 2010, 8:58 am

Wow Encrypted32 this is a very good thread thanks a lot. =]

SpermWhale - July 31, 2010, 9:15 am

nice job, bro

I tv'd this guy, awesome defacer! ?

pwntoken - July 31, 2010, 9:38 am

thanks a lot. =]

Thank you Seifer Blade for your compliments ! I wish you enjoy my Tutorials. ?

syrenen11 - July 31, 2010, 9:49 am

Thank you for this thread. Although, I know most things on here, there were a few things that I
brushed up on. More specifically, the E-Books written by Ankit Fadia. This can be very useful to new

members that are just joining, and I hope that they can all see this.

Again, great share, thank you.

Stay anonymous. :)

Diox. - July 31, 2010, 9:51 am

I dont think anyone will spend the time to master c++ before they join this forum lawls

pwntoken - July 31, 2010, 10:14 am
