Thread: [Electrify Spam Sender - Send spam to an email](#)

prilux - May 22, 2017, 12:06 pm

Electrify Spam Sender is a tool to send several emails to any email address (hotmail/yahoo/gmail/etc). The program let you configure the title and message of the spam email and send from different valid sources. In seconds a user will be able to send the same message from different emails filling this way an email address with spam emails.

The advantages of Electrify Spam Sender vs other email bombers

- 1) Easy to use, just need the target email
- 2) Let you customize the title of the email
- 3) Let you customize the message/body of the email
- 4) Send from different sources
- 5) All emails goes to the inbox (it can bypass gmail filters)
- 6) Doesn't need to have an origin email like other email bombers do
- 7) Low quantity of repeat emails (this will void sending multiple emails)
- 8) Captcha protection from abusive users

Between other features...

Electrify Spam Sender is the perfect tool to send spam to any email because it can bypass the mail filters. For this reason a download link isn't provided. Pm me for more details or to publish a video of Electrify Spam Sender working.

whats the password? btw nice work

prilux - May 26, 2017, 6:51 pm

The password is "electrify".

xxGangsterXx - May 26, 2017, 9:25 pm

Omg Vouch Prilux its really work

ouiouaa - July 13, 2017, 9:25 am

Hey prilux, can you load a list of emails into your program and send one email to all users in that list?

Also do you support html emails and attachments?

dnewkid - July 13, 2017, 6:05 pm

nice, will try it out. can it send multiple emails?

fahaad1095 - July 14, 2017, 12:36 pm

does it support html message??
