Are they using a Dedicated game server or is it VPS server hosting a small game?

And how long would you try to "Take it offline for" OVH has increased their mitigation and I doubt YOU will hold it for a long period.

It all depends on what its for OVH Gaming is heavily strong so yeah OVH enterprise dedicated is on OVH DDoS Pro which gaming is better than pro.

OVH SAS game server I do not know the protection.

After informing nobody is able to make the server lager
