Another photo manipulation practice. Also used a tutorial on this one. Couple more and I think i might attempt completely on my own. ?

Kinda fucked up rendering the bottle but other then that I think it came out really good.

Another big image so ill just leave as a link.

Yeah i fucked up the rendering of the bottle. Used the quick selection tool instead of the pen tool because I was lasy lol.

The one on the right I'm not sure what is wrong tho. Can you explain pls?

It won't let me post links/images bc of post count, so sorry if it doesn't make sense.

1. Your ocean seems to ignore that bottles have "barriers" inside. Your oceans go over the barriers.
2. At the neck of the bottle, it looks like the ocean is above it.

That it amazing!!

I seriously wish i had the talent for stuff like this!

I can paint with spray paint haha not digital art

AWESOME WORK!

Dude you need to do this as profession.

You can make some serious \$\$ and since you love doing this it would make sense.

My ocean knows no barriers. Lol  
I might go back and fix if I have time.
