BEFORE YOU READ THE REVIEW

Spoiler [\(Click to View\)](#)

-You must understand that the reviews I make are from my point of view.If I grade 3/10 that doesn't mean the method itself is bad, maybe for other people that method is 7, so keep this in mind when you're reading my reviews.

-My reviews will probably piss off many people and break some of their businesses ...or raise them.This means I will not debate with the sellers whether or not my reviews are accurate.Unless there is really something wrong I won't recheck my analysis.

-I review good and bad products, not only bad products as some of you may suspect.In the end, remains the decision of the reader if it's bad or good.

FAQ

Who am I?Spoiler [\(Click to View\)](#)

-A random guy that bought dozens of methods in the past few months from HackForums Sellers, and with disappointment, I announce that 90% don't work or they require insane hard work to even get them started. Highly "vouched" methods, with "valid proofs" from so highly upper-class "highly vouched members/old members" or how you want to call them, methods that look good on paper but on practice leave you with a sour taste in your mouth and with dust in your wallet.

-For those that keep asking me, "who I am and how I buy for months but my account is only for a week". I've been on hackforums for awhile now, my first account was around 2009 but was disabled due to inactivity. I kept coming back.Never engaged in topics too much.Until 1'st May when I decided I should make reviews about products.

What I'm going to show you?Spoiler [\(Click to View\)](#)

Few angles to look at when you're buying a method and few insights of what each method consists of.

I will keep this short and say this - you don't have to become an investigator but in the end is YOUR money and YOUR time you're going to throw at a random guy that promises you the moon.

Personal review:

About the product:

The Crack

Design GUI:

Everything happens in CMD. It's self explanatory that it's not an extraordinary design. However, it raises in efficiency making it easier.

Difficulty

The cracker It's very easy and straightforward, after creating a combolist.txt and proxy.txt, you run the .exe and it will ask you few questions about the cracking process you're about to begin.Will take less than 10 seconds to begin.After the process is done each account found is filtered into .txt per account or all in one .txt, depending on what you choose before starting.

You don't have to search for Proxies since it has a feature that provides self-proxies. But you can if you really want to.

Efficiency

EDITED: I've used a 40k combolist that was originally posted 3 weeks ago on one of the forums. After around 10k combos were scanned I stopped and found a total of 4 accounts, all 4 are currently working.

After the process ends the accounts are listed in .txt files, each one of these .txt files contains what that actual account has uploaded, which makes it easier to look up if you're targeting something specific.

Other

The seller provides you sources where to search for Combolists/Proxies.

The Money Making Product

4/10

-Blackhat method, in order to get it started requires a bit of luck. Eventually, the "luck" will hit you considering the reason why you buy a cracker.

-It's very risky, if you get it going you may want to think twice how you want to payout and/or if you go full rogue.

About the seller:

Spoiler ([Click to View](#))

6/10

Doesn't have many questions in his thread, probably due to the fact it's a cracker so it's self-explanatory to most.

-What he advertises that's what you get.

-The cracker is very easy to understand and use, however, the money making method explanation is pretty vague "if you get X, do Y". The seller could've definitely given more details to how to avoid the risks and/or how he does it.

-Provides you few sources where to search for the combolists and proxies.

-You can find what he mentions in the first post, in the end, Mega.NZ is a upload website where people upload personal files, so it's possible to find everything he stated.

-Doesn't provide proofs of earnings from the method.

-If you're new with cracking, in general, you may want to keep sellers info close.

This grade reviews his way of advertising, addressing to potential customers and his way of convincing them and also the relation between him and his product.

"Of this 50 accounts some worked to enter and some didn't. Not sure if it's the Cracker or my combos were already used and Mega.NZ locked the accounts. "

This is because you went into the Filtered.txt, all the working accounts you can find them on Accounts.

Mr. Reviewer - May 24, 2017, 8:21 am

I've tested again with the settings you've send me and yes, at 10k combos I got 4 as Good and they all worked, I will edit now that sentence.

Pretty good review. The mega.nz cracker is actually fking awesome for its' price. You can find out the .dat wallets from the accounts and try to steal them for example. You will make easily your moneys back and a lot of more.
