Thread: [Best way to target infect people?](#)

lamgonenow - May 24, 2017, 7:25 am

What do you think a fast and simple way to infect targeted people? (Talking through phone).

I dont mean what method to convince them, but a method to get them to download it with ease, no hassle (eg. direct link)

INCREDIBLE - May 24, 2017, 8:00 am

You need to work your way through tutorials and latest technology. just Hackforums won't help you in this regard. unless you have physical access to the device of the person you wants to target.
