I would love to receive this, going to PM you right away!

BigDap - July 11, 2017, 6:56 pm

This is nice.. but no host/server is bulletproof.

Quite possibly just resellers of specific server farms like OVH/NFO/Twivh (You can buy them), Google-Cloud but all with different names due to reselling.

I like the idea, i like where posts like this goes and the services attached are generally genuine and legit.

Good luck with it, man.

Thanks for the post. I'm sure many thing there are such things as fully bulletproof, but that unfortunately is not true. However, almost all the sites on this list allows more things people here are interested in hosting. While at the same time they provide more security conscious benefits that more mainstream hosts aren't able to provide.

Mr.DoomHead - July 12, 2017, 8:21 pm

I shot OP a pm and he replied almost instantly.

Thanks again for the list, i am sure it will come in quite handy.
