Thread: [RIPS 2.0.0 - PHP Security and Code Analysis](#)

Mayweather - May 25, 2017, 4:13 pm

Why is nobody talking about this ?

All the vulnerabilities its found:

<https://www.ripstech.com/security-vulnerability-database/>

Demo:

<https://demo.ripstech.com>

read more about it here:

<https://www.ripstech.com/static-code-analysis/>

overall this makes php code analysis so much easier..

why tf hasn't this been leaked? hmu if you know someone with the source

i95swervin - May 26, 2017, 10:22 am

Im pretty sure thos is the source.

<https://sourceforge.net/projects/rips-scanner/files/rips-0.55.zip/download>

Gotcha. Will keep an eye out

shoggoth - June 2, 2017, 2:07 am

RIPS 2.0 is commercial SaaS only, not open source. You have to buy a licence and use their hosted platform as far as I understand, although they might allow self hosting at some point, in which case, it will probably leak.
