Thread: [Is it possible to use an animated gif profile pic or just siggy?](#)

kpown - May 26, 2017, 9:20 pm

Hey guys

I often see animated gif siggies but i was wondering if animated gif for avatar is possible?

The reason I ask is because my current profile pic is a gif that is supposed to be animated but when I put it as my hf profile pic it is now frozen into an image.

Any ideas?

Who Soup - May 26, 2017, 9:25 pm

I think Omni's profile is a gif blinking.

did you upload via URL?

ZuGgY - May 26, 2017, 9:30 pm

Umm I have a GIF as my avatar?

It should be fine.

Steve - May 26, 2017, 9:33 pm

It's definitely possible, but I don't know why yours isn't working.

(May 26, 2017 09:25 PM)Who Soup Wrote: [\[CITE\]](#) I think Omni's profile is a gif blinking.

It doesn't blink, but the eyes occasionally move. It represents the fact the he is always watching - that he is Omniscient.

The file on my desktop is named avi.gif

When I try to open it with windows photo viewer it's a still image, when I open it with a browser it's a moving gif

When I directly used the image on my desktop as a I on HF it's a still image

What do i do?

ZuGgY - May 26, 2017, 9:42 pm

Mind sending me the image? I wanna look into it.

James Burnham - May 26, 2017, 9:44 pm

Maybe it's filesize is too big?

kpown - May 26, 2017, 9:54 pm

Try putting this url in where it says Avatar URL: <https://i.imgur.com/YaEEhGU.gif>
Then hit change avatar.

Look, it worked for mine.

damn okay ill do that!

UPDATE:
The URL you entered for your avatar does not appear to be valid. Please ensure you enter a valid URL.

gunna try again rq i think i know whats happening

UPDATE 2:

GOT IT

Thanks to everyone for helping me!

Prettykitty - May 26, 2017, 10:05 pm
Congrats look like OP solved this. I was watching you :P

ZuGgY - May 26, 2017, 10:06 pm
Sorry I couldn't be much of help at the end, but congrats!

My guess is it redirected you to the imgur page of the image instead of the image itself, maybe. When I just clicked it that's what it did oddly.
