Thread: [how tf people play with that mouse sensitivity](#)

Null - May 26, 2017, 9:28 pm

I've seen people playing with 0.5 and 0.7 sensitivity, i just can't handle this at all, i'm feel comfortable with like 3+ sensitivity.
is this normal xD

EternityX - May 26, 2017, 9:47 pm

Not everyone has the same DPI as you

JUSTIN - May 26, 2017, 9:48 pm

0.5-0.7 sens is fine with 800 DPI iguess
I play 1.21 sens on 400 DPI

Reporter - May 26, 2017, 10:21 pm

There's more too it...

Mouse sensitivity & refresh rate
Ingame sensitivity
Windows Mouse sensitivity

Bubbers108 - May 26, 2017, 10:22 pm

It's all preference, that's why. A friend of mine plays on 8 sens lmao.

Lexy- - May 26, 2017, 10:31 pm

I played on 1 sensitivity on default DPI because of how slow and controlled it felt. I eventually had to up it because I couldn't turn away from flashes and felt comfortable with 2.37 on default DPI.

zohanhacks - May 26, 2017, 10:44 pm

yeah for me its 400 dpi and 1.2 ingame sens

Copywriter - May 26, 2017, 10:57 pm

Many pros play on hella low sensitivity in general is because it provides more accuracy. They have a large ass mousepad, and they aim with their ARM, and not as much in the wrist.

NegativeRep - May 27, 2017, 12:54 am

I got used to 0.8 and 450 dpi on 1080p res. Windows sense being default.
This is mostly due to me being a competitive surfer and not for match making. I can't aim a gun but I can fly through a tear 4 to 5 map.

I measured my new mouse pad being 3ft by 2ft. About 0.5ft lost to keyboardm

ir0n - May 27, 2017, 1:34 am

I play 2.5 currently. My "perfect" sens is around 2.2 but I'm willing to make the compromise of a small amount of accuracy for the small adjustments and wrist play that I prefer and is harder to do

on a 2.2 sens. 400 DPI btw.

milkpop - May 27, 2017, 1:57 am

2.08@400 dpi. We in there.

baka~ - May 27, 2017, 2:04 am

I used to play with 0.5 sens and then mouse acceleration and then moved to 1.3 without, I dont think i would ever be able to use more than 2 xD

Menalix - May 27, 2017, 2:27 am

Cause only gays have their strength and balance in their wrists, normal men will tend to take up a larger pad area and use the arm and be able to use muscles which allows for more precise play.

creki - May 27, 2017, 7:49 am

2.5 @ 400 is master race.

Patrick Jane - May 27, 2017, 8:39 am

I feel like you're asking me specifically. I have 0.63 sens with 450 DPI.

And no it's not normal.

DeadShot - May 27, 2017, 8:51 am

2000 dpi , 2.5 in game , default windows

Null - May 27, 2017, 9:08 am

I never use my arm tho, all wrist plays.

Twitch - May 27, 2017, 12:46 pm

thats what im fuckin saying Imfao it depends if you are a wrist or arm player. i use wrist with 2.4 sen and 1200 dpi

NA Riven - May 27, 2017, 12:49 pm

I use 3,7 with 800 DPI. Send help plz

NurSpec - May 27, 2017, 12:51 pm

Much more control when using a lower sens, hence why nearly every single global elite, professional, rank s etc. players use a low sensitivity. I use 1 in game with 400 DPI. It will feel very slow and weird at first but you should try and get used to a lower sens.

Twitch - May 27, 2017, 12:54 pm

Its all about how the persons brain works

?ictor? - May 27, 2017, 12:57 pm

I play 0.7 400DPI lmao, I have a huge mousepad

Twitch - May 27, 2017, 1:21 pm

(May 27, 2017 12:55 PM)- Sam - Wrote: [\[CITE\]](#) Well a slower sens is overall better for accuracy. If you have a very high sens your crosshair will skip pixels and shit. well that depending on your res and monitor im pretty sure

rsx - May 27, 2017, 5:46 pm

I play on 500 dpi and 1 in game sens

People say it's too slow but I like it

NurSpec - May 28, 2017, 1:24 am

(May 27, 2017 12:54 PM) Bashlight Memes Wrote: [\[CITE\]](#) what you stated is nothing but an opinion/personal preference. Its all about how the persons brain works

It's not lol. There's much more to it than a 'personal opinion'. There's theories behind it which I cannot be bothered going into detail with, but do some research and I am sure you'll find out exactly what I mean.

poisson - May 28, 2017, 1:26 am

1.4 @ 1200 DPI on 1620x1050

Underworldproblem - May 28, 2017, 10:55 am

DPI: 400

Sensitivity: 1.3

Refresh Rate: 1000Hz

You just need a big mousepad to be able to swing wide - SteelSeries QCK+

Menalix - May 28, 2017, 11:57 am

(May 27, 2017 12:53 PM)- Sam - Wrote: [\[CITE\]](#) Unless you're Hiko. He uses like 800 DPI and 2.4 sens. Inhuman reactions.

Well he's fat af, his weight is making his mouse movement more slow since he has lots of fat to move around when pulling the mouse in a direction, so he needs the higher sens, to not exhaust himself.

Niccolò Machiavelli - May 28, 2017, 11:59 am

1.9 with 800 dpi on hard mat

Fortunate - May 28, 2017, 12:13 pm

I play 800 CPI with my in-game sens being around 0.8-1.

Not sure what CPI you play on.

The One Who Knocks - May 28, 2017, 4:26 pm

Traditionally, having extremely low in game sensitivity with high(er) mouse DPI makes quick movements smoother.

So yes they play on like 1 in game sense, but their dpi is probably like 3x higher than yours

creki - May 28, 2017, 4:49 pm

"Probably" when there is data online that you can check...

Most pros have a pretty low sensitivity.

is this normal xD
I know right? I tried once and its annoying, weird and i look like i am a freaking spastic

Fragger - May 28, 2017, 7:19 pm

400 DPI 2 sens, most people who play on a super high sens have a low DPI.

Fortunate - May 28, 2017, 9:34 pm

So does Menalix.

Slightly. - May 28, 2017, 11:29 pm

800 DPI - 0.8 sens. ?

630 - May 29, 2017, 1:26 am

1 sens 800 dpi. Used to play a little higher but have toned it down a lot.

SIM-2562043 - May 29, 2017, 4:28 am

I play 1000 DPI 0.8 in game, used to play 1000 1 but I felt its too high.

DynamicDunce - May 29, 2017, 6:34 am

I play 1 sens 500 DPI, but my mousepad is a metre wide so.....

netpulse - May 31, 2017, 2:12 am

Not really, there's some guys playing with 3~ sens and 400 dpi.
Not really low. They are mostly around 2~ sens and rarely under 1.

(May 28, 2017 04:24 PM)- Sam - Wrote: [\[CITE\]](#) Fat yet better at CSGO than you will ever be.
I think I'll be fine in life, without extreme gaming skills, thanks for the worry though.

B?ue - May 31, 2017, 3:13 am

I'm on about 0.7-0.8, not sure on my DPI I got a new mouse recently but it's the lowest default setting it will go (corsair M65 Pro)

onlineprofessional - May 31, 2017, 2:26 pm

I'm using 0.65 sens, 600 DPI and no mouse acceleration :^)
