BEFORE YOU READ THE REVIEW

Spoiler [\(Click to View\)](#)

-You must understand that the reviews I make are from my point of view.If I grade 3/10 that doesn't mean the method itself is bad, maybe for other people that method is 7, so keep this in mind when you're reading my reviews.

-My reviews will probably piss off many people and break some of their businesses ...or raise them.This means I will not debate with the sellers whether or not my reviews are accurate.Unless there is really something wrong I won't recheck my analysis.

-I review good and bad products, not only bad products as some of you may suspect.In the end, remains the decision of the reader if it's bad or good.

FAQ

Who am I?Spoiler [\(Click to View\)](#)

-A random guy that bought dozens of methods in the past few months from HackForums Sellers, and with disappointment, I announce that 90% don't work or they require insane hard work to even get them started. Highly "vouched" methods, with "valid proofs" from so highly upper-class "highly vouched members/old members" or how you want to call them, methods that look good on paper but on practice leave you with a sour taste in your mouth and with dust in your wallet.

-For those that keep asking me, "who I am and how I buy for months but my account is only for a week". I've been on hackforums for awhile now, my first account was around 2009 but was disabled due to inactivity. I kept coming back.Never engaged in topics too much.Until 1'st May when I decided I should make reviews about products.

What I'm going to show you?Spoiler [\(Click to View\)](#)

Few angles to look at when you're buying a method and few insights of what each method consists of.

I will keep this short and say this - you don't have to become an investigator but in the end is YOUR money and YOUR time you're going to throw at a random guy that promises you the moon.

Personal review:

About the product:

Spoiler ([Click to View](#))

7/10

-Overall you'll need a bit of creativity and some time to get it going.

-The owner provides you good examples and few scripts to follow in convincing your victims(some are very plausible).

-Some nice routes to follow in baiting your victims.

-Some require a bit of investment of only ~1-5\$ for buying hosts.

-Won't say UNIQUE but I really find the methods usefull even though I am not spreading any malware.

-I don't think the methods can really become saturated, if you try to use a bit of imagination and don't rely only on the scripts he provides you.Considering this is a freebie probably many spreaders have already smoked these scenarios.

About the seller:

Spoiler ([Click to View](#))

?/10

This product is a freebie and the owner asked me if I could review it. Therefore there is no grade on this.

-My only complaint is why this product is not for sale.

-One of the methods has the download links expired but it's fine considering it's a freebie.
