Thread: [NJRat updated Pw.dll plugin](#)

HOLLOWZ - May 28, 2017, 1:19 pm

This here is a version that i found while gravedigging posts on HF so i take no credit here just helping those that i see always claiming the password recovery does not work so this here is a solution.

[On the left is the regular size of the pw.dll that came with the download from xVulnerable and right is the updated version.](#)

[Here is a picture of me recovering a password successfully](#)

Download the Zip file containing pw.dll and replace your current version.

[Here is](#) a link to Njrat from xVulnerable

I've seen people claim that plugins could be infected so if you are good at reversing let me know cause then i would need to head to whitehate but i've had this for months so most likely not.

ill try it, look safe

thanks for sharing

edenchanneltbh - July 11, 2017, 7:20 am

It is safe. Thank you for the dll.

NewFoundation - July 11, 2017, 12:24 pm

This is amazing! Thank so much.

SIM-2564555 - July 11, 2017, 4:37 pm

ya thanks i think this will be helpful to many NJrat users

NyQuil - July 17, 2017, 8:13 pm

there a reason the original dll has no runpe function but this "updated" one does?

Why on earth would you announce that? Download links dead anyway.

SIM-4271792 - June 23, 2019, 12:21 pm

Help its not working for ME!

Keurig - October 14, 2021, 10:26 am

Anyone have the download for this still?
