Thread: [Thread & Signature image not showing? Showing codes instead](#)

Why is the image bb code not working?

Code [img][img]

I used it on my sig and it doesnt show the image but displayed the bbcodes/links instead:

Also when i checked my thread, it wont show the image as well and just like my signature, it only shows the bbcodes & links instead of displaying the image:

How to fix this?

This is all I could think of as well.

Omni is now using strict SSL.
