it's funny because I bump my thread once I get a warning and my thread deleted but everyone else on here does it and nothing happens haha I was just saying from prior experience.

Arctic Wolf - July 16, 2018, 6:04 pm

In the last 7 years that I've been on Hackforums, I've had many occasions to engage the services of 'graphic designers'. I've come to discover that while many people claim to be 'graphic designers', 'graphic artists', 'digital designers' etc., very few can deliver the goods. They either have an abundance of creativity but don't have the technical skill to execute their / your vision, or they have all the skill in the world but are sorely lacking in imagination.

Then, there's WickedChoco. I had the good fortune to discover his thread and after tearing through it at least three times and being increasingly impressed with her portfolio each time, I decided to contact him.

Right from the beginning I realized that WickedChoco was different. Instinctually, He seemed to truly understand the most important thing that all the others before her had missed. He listened to me. Rather than trying to tell me my vision before I had even finished explaining it to Him, he listened. Asked a few questions, and then listened some more. At that point I knew that if she would take me on as a client, that she would design everything I would need for many years to come.

If you were to ask anyone who knows me they would tell you that I am a perfectionist with OCD tendencies. I am a 'tweaker' and 'tinkerer' by nature. If something is good, I want to make it better. If something is really good, I want to make it excellent. If something is excellent.....well you get the idea. Anyway, after very few revisions (by my standards), WickedChoco delivered a direct marketing piece that was the epitome of what I envisioned. He then went on to design a website that in my opinion is a digital work of art, combining aesthetics and functionality in a very uncomplicated manner.

On the second direct marketing piece, WickedChoco nailed the concept after only one revision! Again, if you knew me you would see how astounding that actually is.

From a practical standpoint, just imagine how much time, effort and money could be saved on your projects if the designer could capture EXACTLY what it is you want after only ONE revision! It means increased productivity and lower costs!....A pretty good combination in my books!

WickedChoco is extremely reliable and professional and delivered every concept on time, every time, without fail.

I will leave you with this thought to mull over while you're trying to decide whether or not your search for a designer is over. If you can envision it and articulate it, WickedChoco can create it. Period. I guarantee it. I don't care what it is or how complicated you think it is, if you can explain it, he can do it.

Trust me, you're finished looking for the designer for your next project. It's WickedChoco. Give him a message, you won't be sorry.
