Thread: [Lots of Cloudflare Errors](#)

thales - May 31, 2017, 10:20 pm

Getting lots of 503 server errors currently. Not sure if anyone else is experiencing this.

Is maintenance going on?

Same here. There's nothing but to wait it out. Seems to be calm now.

Probably someone attacking HF, it appears mitigation kicked in as I'm no longer getting them.

yeah same here

close as many HF tabs as you can and try to only use one

I very rarely get them excluding tonight, just something you'll have to wait out unfortunately.

Getting a shit ton, to the point where HF is annoying to use

Fix plz, hf gods (aka omni)!

Seems to have stopped now.

Could have been a large attack, that has been mitigated now or maybe it's those old drives playing up.
