Hello everyone,

As maybe you know, NetSeal has been closed since soon a week.

I'm looking for a secure licensing system with cloud variable, encrypted communication, hwid, etc.

I need a panel App/web I don't care, and the .NET class for using.

I'll give 100\$ for that, payment in btc.

For any request PM me or add me on xmpp : frenchcrypter@xmpp.jp

Any deal will be done on HF, new members are not allowed to contact me. Before PM me make sure you've already did the job because I can't wait 2-3 days.

Thanks.

Check this one <https://wyday.com/limelm/>

I've moved my netseal project to them and it's doing job for me.

There are a few more similar systems, don't waste money on custom one, spend them on something else.

He is currently banned on HF, so I doubt you'll deal with him unless you don't mind
