Could someone explain to me what exactly HVH cheats are? I looked online but just found people selling them.

Also, what is the best cheat to buy at the moment for Facelt and reg mm?

skeet is probably the best HvH cheat that can be obtained but the chance of getting it are next to 0. Your next best bet would be aimware for nospread and chods for spread. Chods also has streaming and faceit support.

Best public HVH cheats you can get your hands on would be Aimware or Chods.

As for legit, I hear interwebz is great but its detection history isn't the best. I also see a lot of people using Iniuria for legit, it has been for UD for 2 years or something I believe.

A cheat based on HvH features. HvH is hack vs hack. Here's an example!

RoyalHack.net is great and cheap for regular matchmaking.
