I can get you hooked up with those easily, and better, Message me on skype: caleb.wilson37 or XMPP: nexuszeta@jabber.at

I have no problem sharing some of my scripts with you free of charge. For future reference, there's TONS of stuff on pastebin if you know how to search for it. Don't ever waste your money on something like this.

Here is a quick and simple SSH bruter I wrote: <https://hastebin.com/rorajegalu.py>
