Wow! This took minimalistic to a whole new level!

Great. Would look even better if houses are not reflected and differ a bit! Keep up great work.

I love how clean and flat it is. Keep up the great work!

Cool as fuck. You got a full size image I can use as my background? That's dope.

This is great; so easy on the eyes and nice to look at

That artwork is awesome. Love that it's simple and clean but still complex.

Looks very good i would say! :) The design is very good and the version in colors is even better, i would try stretching the village so it would be "Bigger".

If you do a colored version with a bigger village i would use it as my background ?

Keep on with the good work!
