Thread: [Cheapest Place To Buy Windows 10?](#)

Sahaj - June 1, 2017, 4:36 pm

I'm getting my new computer in a few days, and was wondering if I could get Windows 10 OEM cheaper than it is on Kinguin. I checked [AllKeyShop](#), but all the sites offering it for \$7-8 seem a bit sketchy. Do you guys know any other trusted websites/sources?

FrogSquad4 - June 1, 2017, 4:40 pm

I don't know if that exists. Maybe you could find a cracked version on #.org. Other than that i'd say go with kinguin.net that's what I used.

If I find no other site, I'll probably go with Kinguin as well as I've bought a Win10 key from them in the past. But I won't get a cracked version.

Just check. Maybe you have the right to use a version for educational organisations ;)

Bastrile - June 8, 2017, 10:37 pm

you could download the ISO and check ebay for keys, I have done this with Office keys from dead machines, works for me:)
