Thread: [\[Everyone\] Free HD Shutterstock without watermark](#)

Elweth - June 2, 2017, 9:39 am

Shutterstock host millions of awesome images, and often times you'll see their watermarked image when you're googling stock pictures for your school's report or vector images for your Photoshop designs.

Here's a method I found which can get HD images from Shutterstock which aren't watermarked :)

Method here. No need to PM or REP for freebies ?

Spoiler [\(Click to View\)](#)

1. Get the URL of the Shutterstock image (e.g.

<https://www.shutterstock.com/image-photo/business-technology-internet-networking-concept-young-302508602?src=cmVSgVBTuT8qweqQVv2z5Q-1-1>)

2. Remove the first four characters 'shut' from the URL, so it becomes terstock.com/xxx (e.g.

<https://www.terstock.com/image-photo/business-technology-internet-networking-concept-young-302508602?src=cmVSgVBTuT8qweqQVv2z5Q-1-1>)

3. Enjoy!! ? Do bump this post up so others can enjoy HD premium pictures for free too!

Looks like the site is getting traffic beyond their means.
