Intro

After Receiving a vouch Copy I was given a License key and a Download Link by the Seller. Upon opening the program, NetBomb, I was prompted to make a account via a pleasant UI online. After Setting my account up, I logged in and was welcomed with my name on a little tab.

Design / Look

The Program has a nice black and grey finish and is nice and easy to my eyes. The overall layout is easy to use and is well organized

Functionality

The Bomber worked well. One thing I would suggest to change is when changing the Number of Emails you have to spam the "+" button to add to the number, I would make it where you can just type in a value

Overall this program is an amazing program and works to the best of what i seen. Has amazing features I have never seen before and I would highly recommend it for this price!

Spoofer works amazingly too !
