Thread: [over the wire not working or just me](#)

simon1138 - June 2, 2017, 5:43 pm

hello,

i tried level 0 bandit and it didnt work. i tried changing the port to 2220 in sshd_config and tried -p 2220 but that didnt work either.

i got serive not known as a result each time.

not sure what i am doing wrong, do these games only last so long?

Rektangel - June 2, 2017, 10:17 pm

This is correct command:

```
ssh USERNAME@SERVER
```

```
ssh bandit0@bandit.labs.overthewire.org
```

Then you will be prompted with password wich is bandit0 for overthewire.

thanks for the reply rektangel, but i have tried that and i get an error. this morning i checked the website and it said they are currently off line. so i imagine this is why i cant get it working?

Just a few of them, i think at least.

I literally ssh'd into their server before replying you, so i doubt their down.
