Thread: [Question: USB HDD plug & play](#)

MrKillerX - June 4, 2017, 1:08 am

Hi, is anyone knows how create a USB hard drive that when connected starts a process instantly without asking for administrator permission.

A plug & play sort of thing.

Thanks in advance.

Check this out.

<https://forums.hak5.org/index.php?/topic/34950-how-to-make-a-usb-rubber-ducky-using-a-normal-usb-stick/>

You can also buy the USB.

<https://hakshop.com/products/usb-rubber-ducky-deluxe>

Then once the USB is setup, use this script to download from a URL & execute a process.

<https://github.com/hak5darren/USB-Rubber-Ducky/wiki/Payload---powershell-wget---execute>

Thank you #Skyline?!! :)

Seems great, will check it out.

Hak5 rubber ducky is extremely overpriced... check other usbA atmega32u4 or attiny85 devices... you can do the same with them, for a price span 1-10\$
