Thread: [\[Review\] "Weco's ComboList Maker" by Weco](#)

Mr. Reviewer - June 4, 2017, 6:09 am

BEFORE YOU READ THE REVIEW

Spoiler [\(Click to View\)](#)

-You must understand that the reviews I make are from my point of view.If I grade 3/10 that doesn't mean the method itself is bad, maybe for other people that method is 7, so keep this in mind when you're reading my reviews.

-My reviews will probably piss off many people and break some of their businesses ...or raise them.This means I will not debate with the sellers whether or not my reviews are accurate.Unless there is really something wrong I won't recheck my analysis.

-I review good and bad products, not only bad products as some of you may suspect.In the end, remains the decision of the reader if it's bad or good.

FAQ

Who am I?Spoiler [\(Click to View\)](#)

-A random guy that bought dozens of methods in the past few months from HackForums Sellers, and with disappointment, I announce that 90% don't work or they require insane hard work to even get them started. Highly "vouched" methods, with "valid proofs" from so highly upper-class "highly vouched members/old members" or how you want to call them, methods that look good on paper but on practice leave you with a sour taste in your mouth and with dust in your wallet.

-For those that keep asking me, "who I am and how I buy for months but my account is only for a week". I've been on hackforums for awhile now, my first account was around 2009 but was disabled due to inactivity. I kept coming back.Never engaged in topics too much.Until 1'st May when I decided I should make reviews about products.

What I'm going to show you?Spoiler [\(Click to View\)](#)

Few angles to look at when you're buying a method and few insights of what each method consists of.

I will keep this short and say this - you don't have to become an investigator but in the end is YOUR money and YOUR time you're going to throw at a random guy that promises you the moon.

REVIEW:

Vouches:

Spoiler [\(Click to View\)](#)

0 Legit Vouches. - Vouches containing proofs.

5 Neutral Vouches. - usually Textproofs: "it works, legit, best cracker I bought,etc"

0 Complaints, refund requests. - self explanatory.

This is rated as a combolist-maker program not a money making one.

Proofs:

Spoiler [\(Click to View\)](#)

8/10

Provides proofs of his own product and tutorials for the features of the product.

This is rated as a combolist-maker program not a money making one.

Personal review:

About the product:

Spoiler ([Click to View](#))

The Combolist Maker

Design GUI:

The design's quite simple but at first especially if you're new to this type of things you'll be a bit confused and don't know what each feature does, however, the seller provides you tutorials for each one of the features.

Difficulty

After you understand how things go the process it's quite simple and straightforward.

In order to have access to the product you'll have to register with your email on his website.

Efficiency

The Combolist works, however, you're going to provide your own Username and Passwords in order to put this program to use. It's a combolist maker, not a scraper.

Works very well with a cracker if you have one, hence the name combolist.

Other

The combolist contains some nice features such as[UPDATED]:

Merge files (in case you have few more .txts with combolists and want to make one big one)

Check for duplicates (in case you have in more .txts same input it will delete and keep only 1)

Export files (you can set yourself how you want it to be separated, through a comma or " etc)

About the seller:

Spoiler ([Click to View](#))

7.5/10

Doesn't have many questions in his thread, probably due to the fact it's a combo-list maker so it's self-explanatory to most.

-What he advertises that's what you get.

-If you're new with this you'll be a bit confused at first but you'll get used to it.

You'll have to experiment few times until you understand perfectly how it works.

-Provides videos and tutorials for the features of the combolist maker.

-Overall it seems like a genuine effort from the seller and that's a big plus.

-Offers [support](#) for his products. In case you encountered a bug or something with his products.

-The product it's based on a license. This means if you upset the seller you can get your product terminated.

Provides proofs of his own products.

This grade reviews his way of advertising, addressing to potential customers and his way of convincing them and also the relation between him and his product.

Thanks for the awesome review :)

Mr. Reviewer - June 5, 2017, 5:57 am

Updated the review.

Forgot one feature of the program.

Kayoz - June 5, 2017, 6:06 am

Nice detailed review! I'm curious though, what do you have to do to get a 10/10 on the "About the seller" section? Reading the description of the seller makes me feel like it should be a little if not way higher than 7.5/10. What are some things you think are missing? Same goes for proofs. It feels kind of like you're just describing the thread without critiquing it or giving any feedback as to why it's 2 points below perfect.

Still, good work. Keep it up :)

Still, good work. Keep it up :) Good question, uhm, that's how I felt at the moment compared to other sellers.

It's more about the correlation between him and his product and the vouches. And that 8 it's more for the fact that a 10 should be perfect in all shape of form(vouches, proofs, product, advertising). The current product it's harder to get it going due to the fact that you need Usernames and Passwords. And doesn't provide that source. You'll have to acquire them yourself. Maybe I was a bit harsh with the grade but the most I would have given is a 8.5 In the near future I am thinking of making a table with the grades now that you mentioned.

I don't provide these things because my Software is made for processing this data ^^ It just makes it easier to create combo lists out of raw data. Normally this is quite a pain to make for example an Excel database by yourself into a useful combolist.
