Thread: [EUR/USD Analysis](#)

TheX182 - June 4, 2017, 7:34 am

Hello.

I would like to share my forex EUR/USD analysis.

In 2017 June 2nd at 14:30 (2:30 pm) the EUR grew. It came to a huge growth from 1.12134 all the way to 1.2776 which happened at 14:48 (2:48 pm).

This was a 12.23% growth which is 0.15626 . If we take in consideration that after my calculations 1.2776 is 100%, then 1.12134 is 87.769%. The 1.12800 mark was reached the same day a minute later. Then it fell to 1.12557 at 15:04 (3:04 pm). The currency held between 1.12557 and 1.2800. The value 1.2800 was reached again at 17:40 (7:40 pm). The Euro held the 1.2800 mark all the way to the closing of the market at 22:57 (10:57 pm) when the value was 1.2798.

If I make a recap from the start of the month the June 1st the value was 1.2425 and it held a relatively straight line until June 2nd at 14:30 (2:30 pm) when the growing occurred which I talked about above.

I think we have a interesting week ahead of us since a lot can happen. Small points for Sell may occur but I still think that for a long term trading Buy is a option since the Euro is constantly growing.

Let me know what you think!

Thanks!
