FIRST OF ALL , if you want to spread via YouTube you need to do research what games right now are in trend and software.

For example today we'll take PokemonGo BOT

What do you need:

Youtube Account

Canva.com Account Or Photoshop

ICON .ico

VIDEO

Firstly you need to have FUD stub server for spreading, while crypting it add a high quality and eye catching icon as an example :

Let's come back to YouTube Side.

Step 1

Finding and downloading video with a working PokemonGo Bot

Best way to do that are just to scroll YouTube and find a video which one looks legit, I recommend you to try tutorial section how to setup bot or any other software you are using.

you can download them via this website: <https://www.onlinevideoconverter.com/video-converter>

Now you have your stub and video let's go to second step:

Step 2

[UPLOADING VIDEO

I think where to upload video everyone going to find and there is no need for further explanations.

Most Important Things to do while uploading:

Keywords : try to add as much as u can keywords suitable for your content.

Description write down legit looking description.

Thumbnail: if you want to be successful in YouTube, you need to make an eye catching thumbnail:

Few Examples:

Tutorials How to Make Them:

FOR PHOTOSHOP:[Video: <https://www.youtube.com/watch?v=k8B4urrTtxQ>]Another One: <https://www.youtube.com/watch?v=WeT1OyMrIcE>

For Canva.Com:

How To Enable Custom Thumbnails in YouTube:

Step 1:

Access your Creator Studio on YouTube.

Step 2:

Under Channel, access the Features setting and click on the VERIFY option.

Step 3:

Select the TEXT option and enter your phone number.

Step 4:

Once you receive a text message (mine came in less than a minute), enter it on the next screen.

After pressing the submit button, you should see a message showing that your account should be verified.

Step 5:

Click CONTINUE to see a green dot next to the "Custom Thumbnails" area.

Once your account is verified and posting custom thumbnails is enabled, access the settings for the video you would like to upload a custom thumbnail for. Underneath the thumbnails YouTube generated, you should see a CUSTOM THUMBNAIL option.

STEP 3

PROMOTING YOUR VIDEO AND GETTING SLAVES

you'll need some third-party application to boost your video LIKES/ VIEWS/ SUBS,

You can do that in one of the following websites:

<http://www.u2bviews.com/>
<http://www.shareyoutubevideos.com/>
<http://www.addmefast.com/>

personally how i did it was kinda how the CPA guys do it which is make some fake proof for the game that looks very undeniable. i might start doing CPA with the same method i used while RAT spreading because i got a good amount of slaves through one video as a noob using darkcomet (like around 50 and another 5 a week)
