Thread: [Ghost in the shell #2 Project \[WIP\]](#)

AvessoVision - June 5, 2017, 3:48 am

Since my first attempt at a sci-fi take, which can be found [here](#), I've decided to give it another try. This is a great way of exercising your skills and practice a lot more ways of creating different lines. I find it very inspiring. All lines were done by hand, with a mouse.

Note that this is not finished, yet I will be posting progress screens below in time as it will get more and more updated.

Thoughts and ideas are always welcome. What would you add? How do you envision it? Get creative. Get inspired.

Updated. I still don't know if I should leave the shaved side. I even tried adding a tattoo but I did not like it. I might as well go back to the hair.

Much appreciated. I have worked on some more detailing. I might post a new update tonight.

Cheers.

I think she'd smash you as well, you know, because she's mostly a robot.

I have updated the OP. I have mixed feelings about it.
Cheers
