[Helix Aim for Overwatch](#)

AIOwnage is proud to introduce our new hack for Overwatch, Helix Aim, Helix Aim has been developed by a team of Computer Scientists who specialize in Artificial Intelligence and Machine Learning. Utilizing, Artificial Intelligence, Machine Learning and Computer Vision the AIOwnage team wishes to usher in the new age of hacking. Your use of our hacks supports our dream of creating hacks that are powered by machine learning, artificial intelligence and computer vision.

In the future subscribers will have the opportunity opt-in for training data collection, which is needed to further optimize the data-driven nature of our work and contribute to the new era of game hacks!

Features

No Reverse Engineering/Memory injection - stay safe!

Aimbot/Triggerbot

Character Specific (In development):

Fast Reload

Wall jump/Bhop

Fan the Hammer no recoil

Hero modules and fine-tuning (i.e. HANZO TRIGGERS)

Price: €10/month

The AIOwnage team believe that hacking should be an affordable hobby, so we keep our prices low. We had fun making them so you can have fun using them.

So head over to <https://aiownage.com/> and join the future today.

Black Hole - June 5, 2017, 7:24 am

Vouch for Rinqt, man is a computer wizard and I've no doubt this bot will get you play of the game 90% of the time.

Ganom - June 5, 2017, 4:59 pm

Any demonstrations? Preferably in game video.

Reporter - June 5, 2017, 5:02 pm

"No Reverse Engineering/Memory injection - stay safe!"

AHK dosen't do this either but it's detected, What makes this cheat undetected?

Horus God - June 5, 2017, 7:21 pm

its still works ? ?

Rinqt - June 5, 2017, 9:59 pm

AHK dosen't do this either but it's detected, What makes this cheat undetected?AHK is a large open source tool, and while I have great respect for it's developers this makes it easier to detect. I obviously can not guarantee 100% undetected forever. However, at this moment the only way we can see being banned using this hack is via in game report only. However, non of our testers have found any accusations against them while using this hack.

(Jun 5, 2017 04:59 PM)Ganom Wrote: [\[CITE\]](#) Any demonstrations? Preferably in game video. Check out our site, <https://aiownage.com/>. We have a GIF up currently, the video is a work in progress.

Correct it still works my good man :)

netos - June 6, 2017, 12:31 am

is there any way i can get a vouch trial run at this?

[warn]

Ganom - June 6, 2017, 9:20 pm

So I went ahead and bought this hack. It has some pretty glaring issues at the moment, hopefully they can be fixed soon.

- No customizable keys for aimbot
- Brings game to a crawl, usually average 144fps. With this it'll dip into the 20's.
- Misses pretty much every shot with triggerbot if you're moving.
- Misc features don't work
- No documentation, has 3 aimbot settings, not sure what they do.

Hope these get fixed soon :)

Thank you for your feedback,

Sorry to hear that you have issues with the product feel free to PM and I will help you in anyway I can.

As the website states the Misc options are in development.

Documentation of the hack will be added ASAP. for now the settings are as followed

Aimbot setting

- 1- legit
- 2- pro
- 3- very fast but looks unreal

Mouse setting

this setting is the reference for the aimbot speed, set this to your in game mouse sensitivity.

As for the FPS drops, can you please send me PM with your computer specs so that we can investigate this issue, non of our testers have encountered this issue and we would like to help you in anyway possible.

(Jun 6, 2017 12:31 AM)netos Wrote: [\[CITE\]](#) is there any way i can get a vouch trial run at this? All current testing copies have been given out for this current run, our next major update will be within a week. If you reply back to me then, we may have a copy for you.

DarkShadowz - June 12, 2017, 5:43 am

Tested it out, would have to say the aimbot works really well. Great use of computer vision/AI in hacks :).

netos - June 14, 2017, 5:02 pm

can i try it now please? plz let me know ty

chrisu - June 14, 2017, 10:25 pm

do u need hp bar to be able to lock on

Ringt - June 15, 2017, 12:02 am

For now yes, however we got something really sexy in development that is providing nice results.

Anton Ego - June 15, 2017, 8:57 pm

posting to come back and maybe purchase in the future when some of the the issues the above user mentioned get hashed out.

Rinqt - June 17, 2017, 12:14 am

Glad to hear, We are currently working on an update that will implement

- Keybindings for Aimbot and Triggerbot is asked
- Inclusion of Hero specific Macros

Other issues have been resolved already via tech support :)

PISSWEASEL - July 25, 2017, 4:31 pm

do you have trials or something up for free or small fee? would like to test for maybe a day and pay little bit for it to check how does it work, im 4k+ so i dont wanna purchase something i wont find worth using in my case , thanks :)

philinyour - November 15, 2017, 11:32 pm

I notice the website isn't active, is your bot still working, or did it get found out?
