If you don't want to use transition, make sure the camera change angles everytime. It's a common rule so the viewer doesn't feel bored watching the video :D.

Use video transitions (take a look at this video <https://www.youtube.com/watch?v=w2-RQxOw2Xg>)
Especially something like 3:00. You could also use some zoom or slide effects

Maybe a scribble effect (<https://www.youtube.com/watch?v=FHQMMLgsLro>)

Please dont see it as hate but only so you can maybe learn something! :) Lol ofc i wont see it as hate xD thanks man ! Really appreciated :)
