-Overall cash earned: 663.98 USD
-I didn't really buy every game that was cheap but games with high review percentage. I would also buy 5-10 keys of the same game. However, if they sell immediately I would buy even more.

Here is my proof:

The payout of each game takes around 14 days.
I think patience is the right word for what you need with this Ebook because sometimes your keys won't sell immediately. However, sometimes the keys will sell immediately. MrReviewer also offers a top-notch support over skype. Overall, I highly recommend this.

I have checked his ebook and I can safely express my opinion.

9/10 Writing & Pictures

Well written no questions, the Ebook has 14 pages with images and examples how you should perform his method.
7/10 Method

I have sold 1 game so far with his method, it works, but:

- The payout takes 14 days. It will be hard to compete with other sellers I have listed 2 games that were not sold in 2 days but 1(californium) got sold in 20 mins after I listed it.

- After I listed the games I allways got asked by G2A for verifications and the games where blocked for another 24 hours...lots of fussing around with G2a....

8/10 Finish & Other

I am currently happy with this I can see it bringing a nice income if you're a patient guy

This method is for people that want to invest at least 100\$ (of course this is my opinion now) I guess....

The eBook is very well explained, I mean it's really comprehensive. The author states everything in detail with the help of necessary screenshots. He also lists the things that you need to keep in mind while selling. The spreadsheet is also very helpful. eBook is very well designed. Although the profit might not be very high but you can still make decent money out of it if you put in the required time.

Out of all the eBooks I can say, this eBook is worth the price. It is because he has put time in this eBook and covered all the basic aspects that an eBook needs to like eBook design, grammar and the quantity of information which is all fantastic. I didn't find any grammatical errors at all and it is very well presented. I can't really find anything bad about this eBook. If you're wanting to buy this, please go ahead. I can vouch for it.

Conclusion: eBook worth the price. If you're interested, please go ahead!

"Woke up this morning after listing a bunch of games to find 2 already sold overnight.."

Thought I'd come back with an update.

<https://i.imgur.com/4Sxhq2O.png>

Woke up this morning after listing a bunch of games to find 2 already sold overnight.

Since the 22nd I've made 3 sales already, and about to list a new bunch of games

What I can say is yes these sites are no secret, however, I found more value in what he spoke about as he gave me a new idea on finding games to purchase and make a good profit. As you can see above, this is NO fast way to earn money, you'll have some days where you might go big, some may be small, or just no profit for days. I think this eBook is very informative for those who want to get into this scene of selling keys, and gives you good places to start.

I also want to mention how people were having verification issues. With your first 10 auctions, G2A will want to check every single key you upload, but I've found after I advertised more than 10 and got verified, they no longer ask for verification and will IMMEDIATELY allow your key. Ever since verifying myself as a seller, everything is instant, I believe even the money I get out of selling is instant, or it's the fact I have G2A shield. Either way, I highly suggest getting verified on G2A if you want to do this, it takes away a lot of the verification struggle.

Pros:

- [+] Well designed
- [+] Easy to read
- [+] Quality methods
- [+] A good organizational system
- [+] All the tools you need

Cons? - Not really even cons, just rambling

[-] idk mate there arent really cons, your gonna need an investment if your one of those kids buying this as a last ditch effort to make HELLA CASH, minimum investment is like 25, not bad, is this even a con anymore?

Grammer: (10/10) - English is well written

Design: (10/10) Has pictures, how most ebooks should look. Looks good, easy to understand and pleasant to read.

Quality: (10/10) Good quality guide, good tips. Wont say anything about what its about but what is included is up next.

Whats included?

A spreadsheet for bundles

A calculator for profit

A ebook on how to do and use this stuff

A BONUS method on how to get free giftcards

Is it worth it?

Are you interested in G2A sales? Are you in need of a hobby capable of generating enough revenue to be almost a side job? Do you have extra time?

If you answered yes, then yes, its worth it. It guides you from A-Z on everything needed to sell on G2A from designing a shop to stocking it to getting giftcards.

Investment?

Yes, obviously you need to spend money to make money. Throw in an extra 25 for a starting investment.

Is it illegal?

No, the bonus method is greyhat at worst.

Seller: pretty nice guy, exposes big nerds

Book: quality, buy it now

Overall: 9.5 - it actually works

Again thanks for quick reply ;)

Looks nice method for making some profits, will be buying for sure.

Just wanted to ask again and see if you understood the question clearly about the profit margin. If I invest like \$200, I will make about \$500 back right? Meaning I made \$300 profits?(150% ROI) OR \$100 profits? (50% ROI).

Let's say you want to invest 200\$, the profit margin will be between 60%-150%, not 150%.

Meaning, at a 200\$ investment you'll have a profit of 100\$-140\$. That's a very plausible estimation.

There are also games you'll make a 150% profit on the initial price, example

I have bought this one for 3.83 and sold for 10.99 this is around 175% profit. This type of games will come rare and depends on it's popularity and competition if it sells and stuff.

Nothing related to Ebay or such. In fact games are more expensive on Ebay than on G2A.

Now you would say why won't I sell the games on Ebay then? You can most definitely do that I've done it myself. But, on Ebay there is this badass payment processor named PayPal, which allways sides with the buyers, people are abusing this, so 1/3 games sold will be chargedback on Ebay.

I never got a chargeback where it was not my fault, I tangle the cdkeys between them sometimes by mistake.

I am offering a source where you can find all the cheap/promo games and sell them on G2A, nevertheless, you'll have to compete with other buyers while selling those games and tinker your price accordingly to what I tell you.

If you want to make money online, this is a good way to start. This is a long term investment, don't expect thousands overnight.

shifty1337 - June 25, 2017, 12:41 pm

I have checked his ebook and I can safely express my opinion.

9/10 Writing & Pictures

Well written no questions, the Ebook has 14 pages with images and examples how you should perform his method.

7/10 Method

I have sold 1 game so far with his method, it works, but:

-The payout takes 14 days. It will be hard to compete with other sellers I have listed 2 games that were not sold in 2 days but 1(californium) got sold in 20 mins after I listed it.

-After I listed the games I allways got asked by G2A for verifications and the games where blocked for another 24 hours...lots of fussing around with G2a....

8/10 Finish & Other

I am currently happy with this I can see it bringing a nice income if you're a patient guy

This method is for people that want to invest at least 100\$ (of course this is my opinion now) I guess....

Spoiler [\(Click to View\)](#)

Woke up this morning after listing a bunch of games to find 2 already sold overnight. Since the 22nd I've made 3 sales already, and about to list a new bunch of games

What I can say is yes these sites are no secret, however, I found more value in what he spoke about as he gave me a new idea on finding games to purchase and make a good profit. As you can see above, this is NO fast way to earn money, you'll have some days where you might go big, some may be small, or just no profit for days. I think this eBook is very informative for those who want to get into this scene of selling keys, and gives you good places to start.

I also want to mention how people were having verification issues. With your first 10 auctions, G2A will want to check every single key you upload, but I've found after I advertised more than 10 and got verified, they no longer ask for verification and will IMMEDIATELY allow your key. Ever since verifying myself as a seller, everything is instant, I believe even the money I get out of selling is instant, or it's the fact I have G2A shield. Either way, I highly suggest getting verified on G2A if you want to do this, it takes away a lot of the verification struggle.

I tried looking up G2A shield benefits, unsure if sellers get any kind of benefits anymore, I know they used too. But getting verified after selling 10 keys makes it a lot easier. Highly agree too that you'd need more than \$15 to invest, currently invested about \$45 so far, going to try sell off all the keys I have before investing again. Made another 2 sales since posting this as well which is great.

You have to become a merchant. How do you become a merchant? You must have a website where you sell stuff(anything). If you do have one by any chance you'll be able to cashout with Bitcoin.

So 10 days ago I had posted this
Spoiler [\(Click to View\)](#)

Now for obvious reasons the Steam sale basically slowed down all sales, prices didn't drop, people just don't look on G2A if Steam has better prices(for once). Now that it is over, suddenly my sales are back. Thought I'd bring another update about this considering this does bring in money even if people say it isn't that private.

I've sorted it this time to everything I've actually sold.

Spoiler [\(Click to View\)](#)

The -\$2.07 is a negative as I listed one item for the full price of the bundle, so every other item in the bundle doesn't have a price on it.

The -\$7.89 was when I purchased 2 keys of this one game from a new website, later found that these could not be sold so I traded these keys for another game with a lower value, so I got some of the money back, but made a loss with that purchase in total.

And the -\$9.88 and -\$9.78 again are bundle packs, listed the full bundle price on one of the game and didn't add it to the rest.

If I had to change a couple things about the excel, I'd make it so the 'You've sold for' is only a total of things that have actually sold, currently it just shows everything you've listed it for(plus the stuff you've sold), so the number is more of an estimate of what you'll have if you sell everything you've currently listed.

Mr. Reviewer - July 6, 2017, 7:10 am

I think I have an option like that and that is the Profit, isn't that what you mean? If it's not I'll definitely take a look when I have some time and add one that keeps count only of the games you've sold.

Nah the box on the very right of the Games page, the "Overview" box that has "You Invested", "You've sold for" and "Profit". The "You've sold for" box adds up all the profit regardless if the game has been sold or not. I'm suggesting that it should only add inside the "You've sold for" box unless you've marked the game as sold (Mark it Y inside the SOLD? Y/N column). I hope that makes sense.

I can vouch for this method, I owe a review so here it is while im bored and sitting in a boat.

Not using template but ill do my own.

Pros:

- [+] Well designed
- [+] Easy to read
- [+] Quality methods
- [+] A good organizational system
- [+] All the tools you need

Cons? - Not really even cons, just rambling

[-] idk mate there arent really cons, your gonna need an investment if your one of those kids buying this as a last ditch effort to make HELLA CASH, minimum investment is like 25, not bad, is this even a con anymore?

Grammar: (10/10) - English is well written

Design: (10/10) Has pictures, how most ebooks should look. Looks good, easy to understand and pleasant to read.

Quality: (10/10) Good quality guide, good tips. Wont say anything about what its about but what is included is up next.

Whats included?

- A spreadsheet for bundles
- A calculator for profit
- A ebook on how to do and use this stuff
- A BONUS method on how to get free giftcards

Is it worth it?

Are you interested in G2A sales? Are you in need of a hobby capable of generating enough revenue to be almost a side job? Do you have extra time?

If you answered yes, then yes, its worth it. It guides you from A-Z on everything needed to sell on G2A from designing a shop to stocking it to getting giftcards.

Investment?

Yes, obviously you need to spend money to make money. Throw in an extra 25 for a starting investment.

Is it illegal?

No, the bonus method is greyhat at worst.

Seller: pretty nice guy, exposes big nerds

Book: quality, buy it now

Overall: 9.5 - it actually works

Its sad that this might be one of the only unique ideas on hf for an ebook

That's something hard to proof and never happened to me. You buy cheaper games from legit websites such as Kinguin, which have strict TOS against carded keys, they just ban the seller and give you a new key in such cases.

The reason why in some places the games are cheaper its because the respective marketplace has a discount sale at that time or a bundle. As you may know game developers don't partner only with G2A.

Mr. Reviewer - November 14, 2017, 4:30 am

There are so many new games released and so little time to jump first on them and get the largest profit.

Being spontaneous it's what makes the difference between rich and poor.

(Dec 13, 2017 02:14 PM)SpudMS Wrote: [\[CITE\]](#) what sort of investment is needed to get started on this?

You can start with as low as 10\$(even lower) and just re-invest the profits.

For example:
on Kinguin -> Deus Ex Revolution
costs: 0.99€ on Kinguin

but on G2A it's 2.79€
after the FEE's are calculated: you're going to get a 1.15€ PROFIT for a 0.99€ INVESTMENT

Imagine if you would buy 10 keys like this, for a 20\$ investment you would make 25€ PROFIT

and G2A has 15 MILLION users, so don't worry about selling your Key.

Hello, I bought MrReviewers Ebook a month ago and it's time to post an update and review of my experience:

-Overall cash earned: 663.98 USD

-I didn't really buy every game that was cheap but games with high review percentage. I would also buy 5-10 keys of the same game. However, if they sell immediately I would buy even more.

Here is my proof:

The payout of each game takes around 14 days.

I think patience is the right word for what you need with this Ebook because sometimes your keys won't sell immediately. However, sometimes the keys will sell immediately. MrReviewer also offers a top-notch support over skype. Overall, I highly recommend this.

I have a few questions.

- Are the games obtained legally or illegally?
- If illegally, could you get in trouble for reselling them?
- Are the games cracked or something, or exactly like they are when you'd buy them, with working multiplayer?
- Is this basically buying and re-selling games from and to G2A?
- Could you sell these games elsewhere, eg. Ebay?

Please answer these and I might consider buying this ebook.

Thank you.

Thank you.

Are these games obtained illegally?

First of all, there is no chance of being obtained illegally due to G2A/Kinguin and other major platforms TOS(if you post a cd-key that's STOLEN / CARDED, the account of the provider will be terminated) so the chances of carded keys are very thin.

Are the games cracked or something, or exactly?

No, no cracked these are games discounted at the present moment, I give you a private source to take advantage of these discounts. :)

Is this basically buying and re-selling games from and to G2A?

You are not allowed to buy-resell games on G2A platform itself. You literally can't G2A keeps track of Keys. But I do have a way to go around that if that's the case.

Could you sell these games elsewhere, eg. Ebay?

Yes, you can, but this is strictly related to G2A.You could most definitely sell them on Ebay if that's what you want! You can use Ebay as a second marketplace if you want.

Thanks

Hello, thanks for your attention!

1. Yes I do provide private sources where you can get the games from (Easy to follow and fast)
2. I also sell on kinguin when there is a game duplicated on G2A or I feel there is a better income on Kinguin, there are good sales on Kinguin too but it's harder to get a payout there , it's a 100\$ minimum withdrawal required.

No more than 30 to 60 minutes a day including the selling part. The good part is you don't have to worry about marketing your games because G2A has over 15 million users.

Like he said 1 hour. I spent a couple hours tho and found a lot of games that could be sales any day. Invest about 50\$ if u buy it.

So far this method will work . I will update when i sell a game . The seller is very helpful so far,on top of this.

give this book a try you will not be disappointment unless your cheap and don't want to spend cash. He even gives you a tool that will save you a lot of work!

Took me 72 hours to make the first sale (although I actually elaborated and got the games even cheaper so it took me 24 hours to find the perfect game + 24hr support temporarily disabled my listing and needed proof of purchase because it's not a cheap game (which was also written in his

guide)).

I sent you a PM btw and never got the upgrade :<

Incredibly I've sold something for \$12.30 profit yesterday, took 3 days but it isn't bad when it's just been sitting there. This will probably always be the easiest way to get a couple dollars. I'm not in profit, but I'm now already pretty close.

So since posting this above message, I have hit profit AGAIN ([Here's the first time I tried all this out](#))

This has to be one of the most simple and easy to do methods out there, games are ALWAYS wanted. I also believe the more you're willing to invest, the easier it is for sure. You can start with a low investment but you're very limited on what you can flip.

I know in the screenshot at the bottom it does show a huge profit, but I'm only counting from what it says on the very right(still unsure why it's only just gone over, but whatever).

I'm not making much at all tbh, I don't care about "Earning \$100 a day" because I count all profit as something I didn't have before, plus converting from EUR to AUD is a big jump lol.
