Thread: [Perm denied -> denied?](#)

Tommy Chong - June 5, 2017, 3:32 pm

Alright, so i haven't been that active lately so I'm not really up-to-date with the changes on the boards.

When I checked my trustscan I noticed my 'permdenied' status changed to 'denied'.

Now my question is; Is this because the trustscan doesn't show the difference between permdenied and denied anymore? Or is it because it actually got changed to the regular denied?

Please enlighten me with your knowledge senpai

Yes, Omni removed everyone from the permdenied list

Wew, that's great to hear to be honest. I was getting used to the fact that I'd never be able to upgrade ?

Well, time to pump up my posting quality I guess

Good luck with your next attempt at getting accepted for ub3r.

I'm glad I got in on my first application back in the day.

Nobody spoke to you and nobody cares about your opinion.

Good luck on the approval. I was lucky enough to get it the first time.
