Thread: [Any Crypto Millionaires?](#)

Babel - June 6, 2017, 10:53 am

With cryptocurrencies exploding over the last 6 months, have any of you gained some life changing new wealth? If I had invested my btc into ethereum 6 months ago I would have been millionaire+ before my 18th birthday...Have any of you personally had gains like this or missed out like I did? Please share your story!

Each and every one of us would be a millionaire if we had invested in BTC a few years ago.

I wish man, but if someone cashes out a million dollars in net profit then that could probably start a down trend at this point. xD

btw we will all be millionaires within 30 years

Yes of course, I am referring more to the explosive growth of other coins since January 1st 2017. I'd say many here at least witnessed that growth.

There is over two billion in daily trade volume for BTC. Cashing out a million in a single day isn't even 1%.

That's 0.05% only

Babel - June 6, 2017, 11:08 am

I guess it also helps that btc can't be shorted as far as I know lol...but there are potentially big liquidity issues in crypto which people should be weary of.

Hence the "isn't even 0.1%".

Sometimes you gotta let the lad have his moment OM

Mr. Moe - June 6, 2017, 11:11 am

Damn OMNI got me there xD hahaha

DevNet - June 6, 2017, 11:12 am

I will be a millionaire someday, does that count?

Gotta be one of the dumbest comments i've read.

KaptaiN - June 6, 2017, 11:19 am

I got in on ETH, REP, and GNT very early. I have several posts on here from way back telling people ETH was the future at \$10 - got told to go away with my pump & dump despite making solid arguments as to why it's a good investment lmao.

I'm not a millionaire (yet) but I've made enough money that I will likely never have to worry about finances in my life & I'm barely in my 20s. Feels good.
