There are no methods for gambling. If there were, casinos, betting sites wouldn't exist.

Sorry for saying this, but you better not release it if you don't want to make yourself look like a fool.

You can only win if you have >50% chance to win, but you won't find that anywhere.

50% chance would break you even in the long run, maybe you win, maybe you loose.

Bustabit has 0.5% house edge, that means you have 49.5% chance to win, means you will loose in long run.

Like every other betting site or casinos, only difference between them are house edges, you will always fail in a long run.

You wont need that much but the more you invest the more you can make.

Mate you do know by posting your bustabit account you are making your method clear?

You are investing 2222 (about \$2) every game and every game you stop at 1.03x that makes you a profit of 66bits

Slow money I doubt you made \$129 from a \$30 investment using this method

I want to show you this, it is a staggered rapetrain and these can wipe you out completely if you keep betting, this one took the profit I made.

But the other account is still up and I am only \$100 up now, yes lost most of the profit as I was not concentrating and run a script with the pause off.

Net profit threshold value sufficient enough to consider 'proof'?

We need something stronger than your regular formula: (Initial Deposit - Mortgage + Endless Excuses = Proof)

Next update guys, now as you can see I have made \$4000 + in 20 hours

I added a third account but the settings were not right and lost \$1000 but still up \$2000. I will readjust things and get it going later.

UPDATE 11/06/2017 00.57 PM

This is how much I have now on 3 accounts now starting from 20k bits . I will update with new amount every few hours

When I made the thread I started around \$50 so these screens will give you an idea on how much I am making

I will keep uploading new screenshots every 2 hours or so in this thread, but only when I am here.

I count the bits on the 3 accounts x that by the BTC price to convert to \$ then convert to £

UPDATE 11/06/2017 09.45 PM

Done what I intended to do and that was to make 1 BTC in 24 hours ?

UPDATE 11/06/2017 11.03 AM

The more I am making is helping me win more thats nice for 24 hours

Here we go again with the drama on poor Black Shadow... Can't we just let to poor man gamble with others?

Obviously people know what they're getting into when they gamble, so let them.

Obviously people know what they're getting into when they gamble, so let them. You're ignorant. Clearly you haven't seen what Black Shadow is about. He has made countless threads like this full of lies, and he acts like it's some money machine. Not to mention he's scammed a user for \$250 which he refuses to pay back over a year later. Oh, and he owes \$1000 to Cameron for a bet.

It's not the gambling that's the issue, it's the repeated lies and scamming that he's done.

I would not refund him as what he bought was a legit good method.

He then opens a scam report, the other 2 members who purchased were happy.
