Thread: [Get free YouTube HR Sticky Views! Free YouTube Traffic Exchange Network!](#)

[YouBlaster] New YouTube Traffic Exchange program

The concept is simple. You sign-up for a free account, earn credits by watching videos and spend those credits to get views on your videos.

It works for YouTube only... for now

You can resell the views. Just create a campaign with your customer's video or sound , tweak it according to your needs and make some \$!

You can send free views to as many videos as you would like! Doesn't matter if you have 1 or 100 (your limited by the active nr of compaigns, but you can delete and readd them when needed).

Your videos will receive YouTube views from other people from our TE program No bots here! You will receive visitors from thousands of people around the world with different IP addresses. It's legitimate and a great way to kick-start your video views today.

Main Features:

100% SAFE

AD Ready & Safe – real visitors for real ads (still monetizing your YT channel and using TE might get your account banned so use at your own risk);

NO Proxies – NO ONE is allowed to use proxies or change their IP;

NO AdBlock – NO scripts or filters are used to block your ads;

NO Iframes – iframes are against AD networks policies;

100% CONTROL

Manual / Auto Visits;

GEO – Targeting your campaign visitors;

Control over all campaign parameters;

Real Browsers – no bots or fake agents;

Limit your nr of view per hour 5-1000;

Limit the max nr of views per campaign(good for view sellers);

Limit views to 1 unique view or unlimited views;

Set your preferred time view for your videos min 20 sec max 900 seconds. Set a randomization factor to make it more human like!

Set a campaign Start & End date;

Use Firefox, Chrome , Portable Firefox or Portable Chrome;

Its just for windows for the time being. So no linux support.
You can set it up on a cheap 2\$ vps tho :) . I can link a cheap provider to you if needed.
