Thread: [My bully indirectly made me rich.](#)

That Poppy - June 8, 2017, 6:04 am

So

<https://hackforums.net/showthread.php?tid=5412706>

I'm getting sued for €3500 (I don't know if he's getting anything yet, going to court end of august).

This made me look for a way to make money.

I started reselling bitcoins, until I found out about other cryptocurrencies.

I invested all my money (around €3000) into cryptocurrencies and I'm now sitting on a pretty big amount...

I'm hoping to become a millionaire of cryptos.

I posted my portfolio earlier(with verified investments) but I also removed it the day after, don't think it's a good idea to go and show people what you're holding.

But yeah, I still wanted to share this...

I think it's pretty cool, how this indirectly made me a lot of money.

Congrats on your earnings though and I guess it turned out better for you than you could have hoped.

'scene' well o well

Not sure what you guys are on about, but cryptos seem very promising...?

If they become mainstream even these guys playing around with \$50 will become rich...

The risk is easily worth it.

Your story is cool and inspiring in many ways.

I feel like whatever force is around definitely was looking out for you because you did not deserve that who stress upon you in the first place.

Live your life and don't let anybody bully you ever again for who you are or what you do.

Was also bullied back then but i'm still trying to find my way from rags to riches hehe..

More power and life to you.

Take Care Bud!!

Just read your previous thread, this is an awesome story OP! You stood up for yourself, and even though you've got upcoming court for a civil settlement you found a way turn your misfortune into a chance to monetize. Now that you're growing in wealth with Cryptos you'll notice that the more funds you have, the easier it'll be to start new ventures for new money. ?

As to your court case though, I think you'll be fine. Seems like you're a generally peaceful person who was just fed up, you can always say they were trying to aim those fruits at you as well as other things they threw. You felt threatened and didn't do anything after you hit him once; as long as you come across as a peaceful individual, I think you'll be just fine OP.

Best of luck with everything bud!

Cryptocurrency investing has a lot of hype. Don't be one of those young kids that loses all their money in the long run because of the whole cryptocurrency hype.

Especially considering 85% of that subforum is hype and conjecture. Not even educated conjecture. Ugh. It hurts to read half the "articles" written by 16 year olds who put their Christmas money into the first coin that sounded edgy and doubled their money. You know they're just going to lose it again and blame everyone else but themselves.

Remind me to check in a year or two after most of these ICO startups vanish and we'll see what everyone's trading then.

Show us a screenshot of your portfolio, you made me curious. Or PM me ?

It brings pain to my heart because I used to be one of those 16 year old kids. Every hyped opportunity I saw I took. If I would've saved money threw all those years and put them into long term investments. I wouldn't be working at fucking Target right now from 9-5.

Well, how much have you made?

Caliban - June 17, 2017, 8:20 am

Making a million isnt gonna happen any time soon. But good luck!
