Thread: [\[TUT\] HOW TO GRAB ANYONES IP ADRESS.\(NOOB\)](#)

xSense - June 8, 2017, 8:53 am

Step 1: Go to Grabify

Step 2: Enter a URL that your victim will be interested in.

Step 3: Click Create URL.

Step 4: Change the URL and then Copy the goo.gl link.

Step 5: Send it to your victim and then in the same page bellow you can see his IP, his country, host name and ISP.

I would appreciate so much if you could like the post ? ? ?.

Good luck Hacking

?

come on :) he edited his post also. at least he tried

P.S. @OP: the last line.. maybe you should edit that as well :D that, if you are stopping to write more tuts

xSense - June 8, 2017, 9:33 am

Thats my first post :) Sorry for any mistakes.

W?lr?? - June 8, 2017, 9:34 am

Wow man you seem like a pro hacker. Good job

You could easily script this yourself using some php. I would recommend using this with the subdomain method @bamboleo posted.

spookyhackerswifey - June 8, 2017, 4:44 pm

dose this tutorial work on windows ?
