Thread: [\[OFFICIAL\] The Brotherhood - Group For Sale // UPDATE: ITS BEEN SOLD](#)

Cryptic™ - June 8, 2017, 4:48 pm

EDIT: GROUP HAS BEEN SOLD

Looking for \$6000 BTC or Ethereum or best offer.

Comes with 2 subforums.

Going to graduate university in April, and I lost a lot of interest in HF around 1.5 years ago. The recent boom in Crypto Currencies has gotten me quite active again.

Mainly stuck around for the past few years because of the businesses I operate here.

Best years on HF for me was the 2011-2013 era, that era was awesome. A lot of the members from back then always say HF isn't the same as it was back then, and it's true. Maybe it's because the userbase was a lot smaller and the community was just a lot tighter and more "family" like, and it had A LOT less drama.

Plan is to sell now and just invest the money into Crypto Currencies. I've turned a 10K investment into well over 300K so I'm looking forward to what I can turn whatever the group sells for into. ([My Portfolio](#)).

We are the oldest group on HF (besides the Red Lions but that does not really count since it was given by Omni to Nokia).

BH has had a blast over the years. We've done tons of things over the years, hundreds of tutorials.

Top 3 highlights from the top of my head atm: We used to operate a "Spy Squad" that was ran by [Connected](#). The squad worked towards exposing members who were multi-accounters, account sellers, and account buyers. That did very well, tons of accounts were prevented from being sold, lots of multi's exposed, lots of scams prevented.

We also had a "White Hat Helpers" program that taught many members how to remove malware and stuff. This was mainly ran by [Aur?](#).

And most recently, the Crypto Sector news has done a lot of good in the Crypto Currency section. [Lookin](#) did an amazing job running it, and since BH is for sale now, he will be continuing it in the name of his upcoming Crypto group.

[illuminati?](#) has been a great help over the years. He did all of the main administrative work with the group (like running recruitments, kicking people, activity checks...etc) He's been a tremendous help.

Shoutout to the ogs (If I forgot to mention you, my bad, I'm typing this up on mobile):

[Roger Waters \(aka raj ?\)](#)

Btw did you ever give those two kids who bought subforums for the group their money back? I think that Raj and Zach kid gave you a small loan of 300 for each sf.

I remember when the group was in the process of being turned back into BH. Was a member of it for a short while when it was Brotherhood, admittedly I never had the interest to stay in it so I was removed. However I enjoyed the history and effort you guys put into it.

A lot of people buy groups for the sole purpose of saying they own one. To flaunt. They don't take care of the group, and thus they let it die. Brotherhood was one of those groups that seemed too stubborn to ever die. You guys kept it going.

Something tells me it will be back again some day in the future.

~10K

9K into ETH which I am holding forever.

1K into Ripple which turned into 27K.'

[I also just cashed out all my XRP. Made \\$27450](#) by [Cryptic™](#)

That 27K into DGB and sia which was worth ~300K before the recent crash (currently worth ~200K), it will go back up again.

And I've added some additional funds here and there.

I am confident I can hit 1 Million dollars within the next 17 months.

This is just the beginning for Cryptos, lots of people becoming millionaires overnight with crazy

investments.

Was a member of it for a short while when it was Brotherhood, admittedly I never had the interest to stay in it so I was removed. However I enjoyed the history and effort you guys put into it.

A lot of people buy groups for the sole purpose of saying they own one. To flaunt. They don't take care of the group, and thus they let it die. Brotherhood was one of those groups that seemed too stubborn to ever die. You guys kept it going.

Something tells me it will be back again some day in the future.
Doubtful, Cryptic would like to move on.

That 27K into DGB and sia which was worth ~300K before the recent crash (currently worth ~200K), it will go back up again.

And I've added some additional funds here and there.

I am confident I can hit 1 Million dollars within the next 17 months.

That's something I would like to do. I haven't been high ROI - just doing day trading stuff at the moment.

Would you say there will be another coin that reacts like ripple did?

I think XVG is a great long term investment.

It's extremely cheap right now and there is no where to go but up. ?

There are other coins on my mind but I have to take a deeper look into it.

I don't day trade. It's very time consuming and can get very stressful.

I'm more of a set it and forget it type of guy.

I like to focus on dirt cheap undervalued coins (coins that are typically < 100 satoshis) that I know for sure have no where to go but up.

Brotherhood as been around for as long as my time here, pretty insane to see it sold.

Captain Steve Rogers - June 12, 2017, 1:22 am

Sad to see Brotherhood go.

Congratulations on the purchase of the group Vyrez. Here's to wishing you many successes and hopefully you can run a group half as good as The Brotherhood was.

Cyber Knight - June 12, 2017, 6:50 am

you would be correct.

Omni has transferred the group over to the new owner. RIP BH.

The new owner will rebrand the group into something else soon.
