WordPress Plugins WP Job Manager - Arbitrary File Upload

Been seeing this exploit in the wild a lot lately so I'd thought I'd share it. ?

Tutorial:

1.) Google Dork/s:

PHP Code

<?php

inurl:/wp-content/plugins/wp-job-manager/

inurl:/wp-content/uploads/wp-job-manager-uploads/

2.) After you choose a site, go to an html online site.

<http://htmledit.squarefree.com>

Paste PoC:

Change target.com with your target's URL.

3.) Choose an image and click upload.

Path to file:

PHP Code

<?php

<https://www.target.com/wp-content/uploads/job-manager-uploads/files/YYYY/MM/your-files.jpg>

Example:

PHP Code

<?php

<http://mydevices.com/wp-content/uploads/job-manager-uploads/files/2017/06/legends.gif>

Video Demo:

[Video: <https://www.youtube.com/watch?v=CF9aAXznkOQ>]

Source:

<https://cxsecurity.com/issue/WLB-2017060029>

Now you can tell your friends you uploaded a photo that said "Hacked" to a website. ?
Enjoy. I guess. ?

Nice tutorial mObile, looks great.

?ictor? - June 8, 2017, 6:18 pm

Nice tutorial, reminded me of the challenge we did :')

Skull-13 - November 20, 2017, 7:23 pm

Excellent material, keep it going!. This are true tutorials.

Root-Cat - November 20, 2017, 11:38 pm

Thank you for this nice tutorial

t3nd3r - December 19, 2017, 2:58 am

can it upload shell aswell?
