This video just came out, what do you guys think on the design so far?

I love it, think they did a really good job and I can't wait for the syndra.
Especially the ice shard effect that Faker asked for.

I'm really glad they're reaching out to the players and actually taking their feedback seriously, it's becoming kind of like when indie games give you the honor of designing an item/cosmetic if you pay them like \$300 during alpha or someshit, but Riot is doing it the right way in the sense that "Win Worlds and design your very own skin!"

gj riot now let's accidentally delete Caitlyn and doran's shield tyty.

rip my wallet when these come out...

But I'd have to agree with the comment above me. For awhile I started to drift away from LoL but these last few patches hooked me again

The designs are amazing tbh. Compared to other skins, these are god tier. lol

The League art team is honestly awesome. Much better than last years IMO.

Dotexe - June 11, 2017, 6:45 pm

The skins aren't that bad as I thought :D Ekko's skin is really awesome btw

I hope they have custom animations/effects and stuff like the 1350-1820 skins have and not just custom recall animations. Either way they look dope as hell. Not long until SKT have skins for every single Champion in the game.
