Thread: [ETH TO THE MOON](#)

Eagerkid - June 10, 2017, 5:30 am

I will say ETH is a coin that never fails to excite me. The techonology and coin itself has so much potential, and is going to crush the market because it actually owns a lot of value to it. I bought some more ETH \$3k+ @ \$255 a few days ago

Omni Has a good thread about ETH with links for users to read and I will add a few more

Welcome to the ETH hype train! You got in late though.

10x - June 10, 2017, 6:53 am

I got in at around 70\$, so happy i did but I only bought 2 coins :(

Frank Underwood. - June 10, 2017, 7:37 am

I also got late at \$253. But its good to be late then never :D

Never to late to invest :)

Edit : just hit \$300 <3

investmentanalyst - June 10, 2017, 9:14 am

I got \$1000 worth when it crashed to \$130.

Amp - June 10, 2017, 9:25 am

I got in at \$7, I'll forever regret not investing so much more.

How many coins are you holding?

Eagerkid - June 10, 2017, 2:15 pm

ETH has been such a nice ride, and now above \$300 is going to be the norm

mybankisemptyy - June 10, 2017, 2:17 pm

Cashed out some of my ETH coins. Still holding, just to secure a bit of the loot.

I invested \$5k at 188 and couldn't be happier. I'm holding for the long run.

Concussive - June 10, 2017, 2:56 pm

I'm definitely gonna hold my eth for awhile i was thinking cash out at 400\$ but i feel like that might hit sooner than i originally thought, it would be insane to see it pass it bitcoin one day

seeing how we are at \$331 right now, I am guessing it will happen sooner than we expected as well :p

Crowley - June 10, 2017, 3:01 pm

I only invested for 1 ETH when it was at \$90 and now i wish i bought another coin... but thats all i could afford at the time lol so far im so happy i invested in ETH

I keep saying it should drop soon so I can invest more, however it doesn't seem to be doing that whatsoever.

Yes it's safe but some diff sites like Poloniex have bigger volume and are cheaper. Safety shouldn't be an issue on cex

Just looking for your opinions guys.

Was a small dip today you could have purchased it at. And think about ETH technology value that they are bringing to the table. If you think it will be worth \$2k and will over come BTC (which if you look, it is beating BTC) then it is a good buy even at \$400 a coin. I have been investing in it whenever I have the money too

I thought it would be by the end of 2018, but now it looks like it can be hitting 500\$ at the end of this month. But I will guess safe and say mid july

Eagerkid - June 14, 2017, 3:31 pm

I can not wait for the upcoming news on the change. I think it is going to be helping ETH a lot, and we are going to be recovering a lot faster than BTC. That is for sure

Eagerkid - June 15, 2017, 4:19 pm

I think it is funny how everyone freaks out about the drops. We are still up on the week, so if you are investing at a all time high then that is your fault, but I think we are even in the green right now. Plus our market cap is getting closer and closer to bitcoin which is very exciting and I cant wait to see that day. I also think this proof of staking is a very interesting concept that I am still looking into but it does look fairly promising

All the people who bought in @\$400

Lmao it really is, it's too hard to watch the LIVE prices currently. I'm holding though, I've made the

mistake of selling on the dip before, then hating myself when it makes its recovery + gains more value afterwards. I hope the change in algorithm brings back that spark that had pushed ETH to where it is today.

I dont want to have a heart attack so I am not watching it live because I will end up holding it till its worthless. Yeah ETH needs a lot of help, fuck all these ICO's

Unexplained - June 25, 2017, 1:43 pm

Something I was saying awhile back. The amount of ETH being used to fund these ICO's is insane. It has to be converted to cash some how. Now, if this price continues to drop what will all these projects do?? It might balance out here soon though.

Glubz - June 25, 2017, 2:10 pm

A lot of ETH holders are shorting and that kind of bothers me. Some experienced holders are even pulling out.

I'm going to hold until it blows up again then sell out. ETH has proved that it has a lot of problems recently.

As for your inquiry on price, nobody knows. I am a confident investor and a believer of the technology behind ETH so I'm in it for the long run.

Personally I would advise against selling.

A true believer, that's what I like to see. And there's absolutely no shame in playing the market, that's what any good trader would do.

I agree, you would be betting against ETH if you were to sell all which is a big mistake imo.
